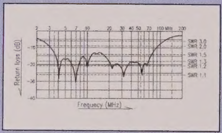
NEW from Kuranishi Instruments LTD, Japan **BR-210** Professional-Grade SWR/Antenna Analyzer

Perform SWR and impedance measurements with confidence! The BR-210 is a laboratory grade precision test instrument providing a wide-band RF signal source for analyzing antenna systems and other equipment without the need for a separate transmitter. • 1.8-170MHz • High precision meter • 500mW 50 Ohm dummy load included • Impedance measurements: 12.5 - 300 Ohm • Connector: SO-239

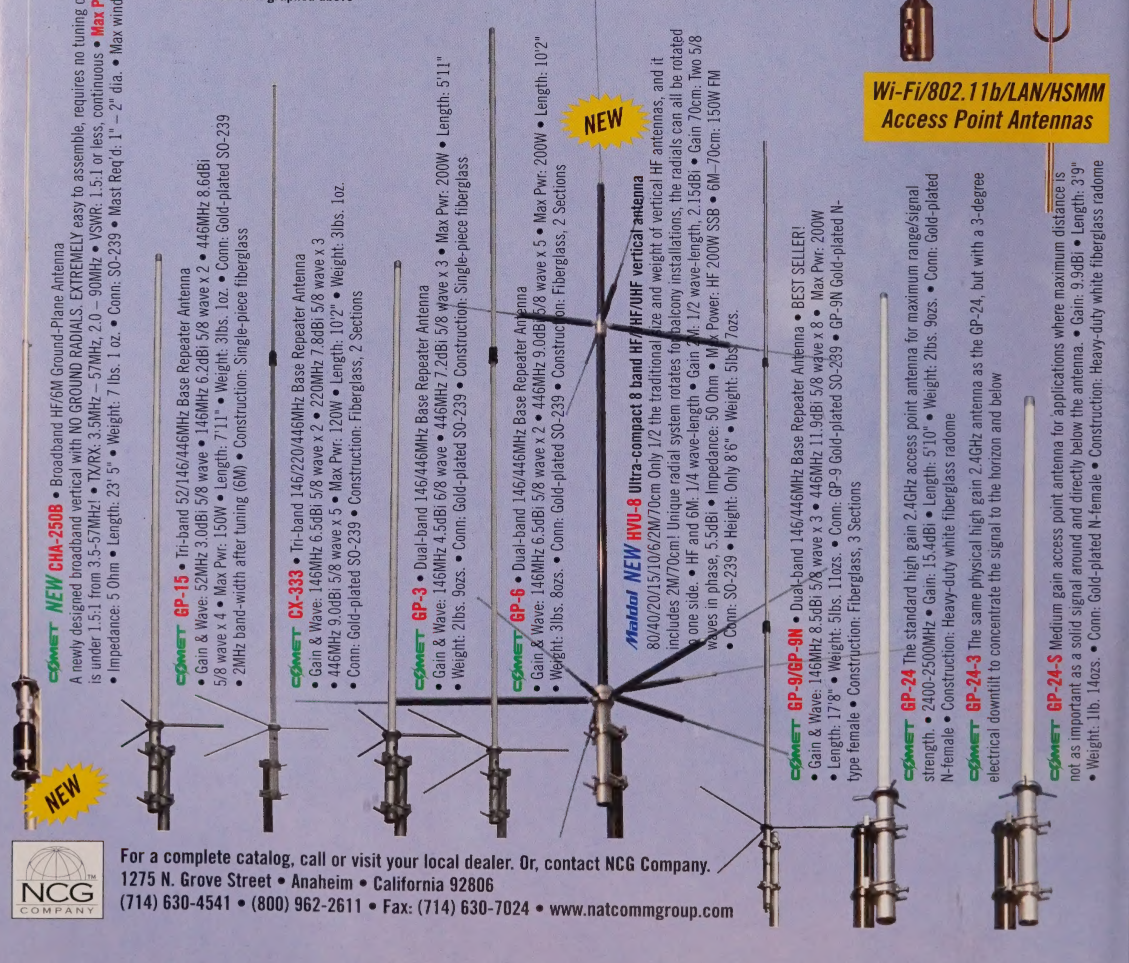
COMET™ & Maldol

Dualband and Multiband Base Antennas



CHA-250B SWR graphed above

"One person can effortlessly raise the antenna at night when no one can spot it, and take it down before daybreak. This antenna is also a great choice for portable operations, such as quick and easy mini-DXpedition to a campground or a nice tropical island! In short, the Comet CHA-250B is simple to assemble, painless to elevate and is easy on the eyes, while at the same time getting you on 6 meters thru 80 meters without the requirement of an antenna tuner and ground radials. You'll even be able to work some DX while you're at it!" – ***Dan Dankert N6PEQ***



COMET *NEW* CHA-250B • Broadband HF/6M Ground-Plane Antenna
A newly designed broadband vertical with NO GROUND RADIALS. EXTREMELY easy to assemble, requires no tuning or adjustments and VSWR is under 1.5:1 from 3.5-57MHz! • TX/RX: 3.5MHz – 57MHz, 2.0 – 90MHz • VSWR: 1.5:1 or less, continuous • **Max Power: 250W SSB/125W FM** • Impedance: 5 Ohm • Length: 23' 5" • Weight: 7 lbs. 1 oz. • Conn: SO-239 • Mast Req'd: 1" – 2" dia. • Max wind speed: 67MPH

COMET GP-15 • Tri-band 52/146/446MHz Base Repeater Antenna
• Gain & Wave: 52MHz 3.0dBi 5/8 wave • 146MHz 6.2dBi 5/8 wave x 2 • 446MHz 8.6dBi 5/8 wave x 4 • Max Pwr: 150W • Length: 7'11" • Weight: 3lbs. 1oz. • Conn: Gold-plated SO-239 • 2MHz band-width after tuning (6M) • Construction: Single-piece fiberglass

COMET CX-333 • Tri-band 146/220/446MHz Base Repeater Antenna
• Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 220MHz 7.8dBi 5/8 wave x 3 • 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 120W • Length: 10'2" • Weight: 3lbs. 1oz. • Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

COMET GP-3 • Dual-band 146/446MHz Base Repeater Antenna
• Gain & Wave: 146MHz 4.5dBi 6/8 wave • 446MHz 7.2dBi 5/8 wave x 3 • Max Pwr: 200W • Length: 5'11" • Weight: 2lbs. 9ozs. • Conn: Gold-plated SO-239 • Construction: Single-piece fiberglass

COMET GP-6 • Dual-band 146/446MHz Base Repeater Antenna
• Gain & Wave: 146MHz 6.5dBi 5/8 wave x 2 • 446MHz 9.0dBi 5/8 wave x 5 • Max Pwr: 200W • Length: 10'2" • Weight: 3lbs. 8ozs. • Conn: Gold-plated SO-239 • Construction: Fiberglass, 2 Sections

***Maldol NEW* HVU-8 Ultra-compact 8 band HF/VHF/UHF vertical antenna**
80/40/20/15/10/6/2M/70cm Only 1/2 the traditional size and weight of vertical HF antennas, and it includes 2M/70cm! Unique radial system rotates for balcony installations, the radials can all be rotated to one side. • HF and 6M: 1/4 wave-length • Gain 2M: 1/2 wave-length, 2.15dBi • Gain 70cm: Two 5/8 waves in phase, 5.5dBi • Impedance: 50 Ohm • Max Power: HF 200W SSB • 6M–70cm: 150W FM • Conn: SO-239 • Height: Only 8'6" • Weight: 5lbs. 7ozs.

COMET GP-9/GP-9N • Dual-band 146/446MHz Base Repeater Antenna • BEST SELLER!
• Gain & Wave: 146MHz 8.5dBi 5/8 wave x 3 • 446MHz 11.9dBi 5/8 wave x 8 • Max Pwr: 200W • Length: 17'8" • Weight: 5lbs. 11ozs. • Conn: GP-9 Gold-plated SO-239 • GP-9N Gold-plated N-type female • Construction: Fiberglass, 3 Sections

Wi-Fi/802.11b/LAN/HSMM Access Point Antennas

COMET GP-24 The standard high gain 2.4GHz access point antenna for maximum range/signal strength. • 2400-2500MHz • Gain: 15.4dBi • Length: 5'10" • Weight: 2lbs. 9ozs. • Conn: Gold-plated N-female • Construction: Heavy-duty white fiberglass radome

COMET GP-24-3 The same physical high gain 2.4GHz antenna as the GP-24, but with a 3-degree electrical downtilt to concentrate the signal to the horizon and below

COMET GP-24-S Medium gain access point antenna for applications where maximum distance is not as important as a solid signal around and directly below the antenna. • Gain: 9.9dBi • Length: 3'9" • Weight: 1lb. 14ozs. • Conn: Gold-plated N-female • Construction: Heavy-duty white fiberglass radome

Michael J. Lewis, WA4KE

As we move into the autumn of the year, the hamfest schedule is winding down and the contest schedule is heating up. Prior to the Benson hamfest, if your club is a ARRL Club, please have your club's secretary or trustee visit the ARRL website to ensure your ARRL club information is updated. This information is used by the ARRL Club Coordinator to direct newbies to the correct club. (Did you know that around 30 new hams are licensed in North Carolina each month?). Thanks for your assistance and I am sure your ARRL Section Manager will appreciate it.

The Carolina 440 UHF link System is continuing to expand with its full time RF link system. Presently there are 10 UHF repeaters linked full time into a Raleigh UHF backbone repeater extending coverage from Interstate 85 in the area of Kerr Lake / Henderson and down Interstate 40 to Wilmington. Plans are to add 13 more repeaters within the next two years covering Eastern and Coastal N.C. The latest additions to the system were repeaters in Clinton, Castle Hayne and Leland. A net called the "Carolina 440 Rag Chew Net" is held every Monday night at 7:30 PM.

On June 24-25, Raleigh ARS members participated in Field Day 2006. The event had approximately 50 participants. Jim and Beth Carroll hosted the event on their farm in Apex, NC and it was the 9th year, the Carrolls have hosted the Field Day. Running 7 stations, emergency generators, 100 watts output, plus a GOTA (Get On The Air) station, the RARS effort yielded 2,692 contacts for a total of 7,768 points.

The Wayne County ARA and the Goldsboro ARC teamed up at this year's Field Day and provided had more activity than any other Field Days. The combination of the two clubs allowed with multiple stations to be operated. (Good recommendation for smaller clubs in the SERA region).

On June 19, Tim Slay, N4IB, NC Section Manager, was on WFAE-FM 90.7 – Charlotte with Mike Collins. The program can be heard at the following link: http://www.wfae.org/wfae/nav1024.cfm?cat=18&subcat=93.

CARES, Carolinas Amateur Radio Emergency Services, had its first official activation on Aug. 8. The 220 MHz system designed to serve hospitals in southeastern NC and northeastern SC was activated after a thunderstorm shut down communications inside the Brunswick County 911 center. When ambulances and EMTs could not relay patient traffic to Brunswick Community Hospital through the 911 center, they sent their traffic through VHF equipment to Seacoast Hospital in Little River, SC, which in turn relayed via CARES to Brunswick Community Hospital in Supply, NC about 30 miles away. Seacoast and Brunswick Community were able to communicate both by simplex and through the CARES repeater in Clinton, almost 70 miles north of Brunswick Hospital and 100 miles north of Seacoast. Ken Boren, KI4GPT, took over August 1 as the Managing Director of CARES from Bill Morine, N2COP. Ken is a hospital administrator at Loris (SC) Healthcare Systems and lives in Whiteville, NC. There have been many articles recently about HIPAA compliance when sending patient information over open airwaves. While there is nothing definitive, most case studies are showing that emergency health traffic through open channels supersedes HIPAA privacy. Still, CARES and other amateur radio systems serving hospitals and public health are monitoring this issue and are implementing as many safeguards as practical.(N2COP)

Web Site for US Repeaters. Jim Glass, AB9IF, reports he is the Webmaster for USRepeaters.com. Jim states that USREPEATERS.Com answers a loud cry for a dedicated repeater directory that is simple and easy to use. He has over 18,000 repeaters on the site now and is adding them daily. He is working on adding a Map system that will let members search for repeaters from any location to a specified radius for any band. This site is a free resource to HAM Radio Operators.

AC4RC, Azalea Coast ARC, on August 30, upgraded the amateur Radio Emergency Services equipment at 2 of the New Hanover County Shelters at Johnson and Codington schools. The goal is to upgrade the Amateur Radio communications ability of all 5 shelters in the New Hanover County System--not only should the power grid go down, but as to serve as an ancillary communications capability should normal channels become clogged in an emergency.

While Hurricane Ernesto became a mild Category 1 hurricane barely above tropical storm level, it nevertheless required activation here in North Carolina where the storm made landfall at

Holden Beach, Brunswick County, NC in the Cape Fear region just south of Wilmington. Brunswick County's EOC and a shelter were fully activated with ARES operators staffing positions for some 70 people staying at the West Brunswick high school shelter. Some gusts broke the hurricane level of 74 MPH but the real concern was flooding. Some areas got close to 12" in 24 hours.

The September edition of the RARS newsletter had an article by Danny Hampton describing his work on his D-Star repeater system. Take a look at the following link: http://www.rars.org/exciters/2006/RARSExciter09-2006.pdf.

The Kinston ARS is currently making renovations to their club repeater and should have the existing club repeater modernized shortly using some Computer Automation Technologies equipment.

NC DEC Area 9 activated on September 7, 2006 to assist with amateur radio support to aid search and rescue teams in the search of two missing toddlers. The two boys, ages 3 and 2, disappeared from their grandparents' home. Although there were plenty of search personnel and volunteers, communications between the teams were compromised. Forsyth County ARES sent several amateurs to assist. Also, one ham from Davie County deployed. The operation began utilizing the 145.31 MHz repeater on Sauratown Mountain as a primary communication frequency.

As I look through the club's websites, I notice several top-notch websites. GARA (http://www.w4gso.org/) recently upgraded their website and I must say, it very well done.

Butch, W4SH, and Ruth, KE4PBA, headed up to Tennessee, for the Ten-Tec Hamfest. I hope to see an article shortly about the hamfest in the Randolph ARC newsletter.

I would like to acknowledge the e-mails, the newsletters and updated websites that I use to obtain news for this column. Without each club's editor, this column and job would be tougher. As long as the editor has the space, we can keep printing the news. Send news, updates and event notifications to

wa4ke@sera.org.

Tennessee

Bob Gault, KD4NEC

Greetings from Tennessee! Fall weather has set in meaning it's a good time to get outdoors and tackle antenna projects you put off because of summer heat. There will be plenty of outdoor festivals, fundraisers and other activities as we await colder weather in the not-too-distant future.

I notice the **West Tennessee Amateur Radio Society** was gearing up to provide communications for a bicycle tour. Preparations were being made as this issue was being put together. The Bagels and Bluegrass Bicycle Century Tour is one of many events being held that needs the communications expertise of amateurs to ensure everything goes alright.

For those around **Ripley**, a note that the 145.230 repeater is back on the air using a 100 Hz tone.

Looking back a few months, a group in **Knoxville** went all out for Field Day. The **Middle East Tennessee Emergency Radio Service** (METERS) operated during Field Day from the area surrounding the Tennessee Department of Health building at Lakeshore Park in Knoxville. This site offered several advantages - a public location, plenty of parking, several nearby large trees for hanging antennas, and a shaded area underneath the main building where all the radios were set up. The club operated four contest stations and a "Get on the Air" (GOTA) station, making a total of 509 QSOs during the 24-hour Field Day period. All radios were running on emergency power, including one station whose battery was recharged by a solar panel during daylight hours. To provide some relief for the members of METERS during Field Day, the Tennessee Federation of Fire Chaplains set up its Rehab Emergency Support Trailer which was recently donated to local emergency response agencies. Completely self-contained and powered by an on-board generator, the trailer has sanitary facilities, heat, and air conditioning. METERS works closely with several served agencies in the greater Knox County, TN, area, including local hospitals,

Dick Wolf WI8X (seated) and Gary Buczkowski AG4XO at the 40 meter SSB station

the Knox County Health Department, the Knox County Emergency Management Agency, and the American Red Cross. Members of METERS have participated in Community Emergency Response Team training, ICS and NIMS training offered by the Tennessee Emergency Management Agency, and training at METERS meetings and nets based on the ARRL's Amateur Radio Emergency Communications Course. Meetings are held on the fourth Tuesday of each month. Additional information can be found on the organization's web site, www.metersinc.org.

Knoxville's RACK (**Radio Amateur Club of Knoxville**) helped out during a local public television station's campaign for funding to support programming. Club members answered phones at East Tennessee Public Television Channel 2, and they received a nice letter of appreciation for their help raising $93,000. The club's Youth Amateur Net (YARN) can be heard each Tuesday at 7 PM on Knoxville's 147.30 linked system.

Bristol, which straddles the Tennessee -Virginia border, had a successful Special Events Station after our last issue rolled off the press. According to the club's "QRM" newsletter, 250 contacts were made by the large group of operators who turned out to help the club celebrate Bristol's 150th birthday. Several of the Bristol Amateur Radio Club group took part in a club project to get an APRS station and a packet station operating on Holston Mountain. Charlie, K4ITV; Don, K4EHI; Lonnie, W4FXO; and Jeff, KI4HIO all had a hand in getting the project completed. The APRS station is W4FXO-4 on 144.390 and packet is operating as W4EHI on 145.010.

Two VE groups administer examinations in Oak Ridge. You can test on the first and second Saturday of the month. The **Oak Ridge Amateur Radio Club** has a website with all the information on club activities. You can find it at www.kornet.org/orarc/.

Testing is also held each month in Cleveland. The VE team uses the **Cleveland Amateur Radio Club**'s building on Johnson Boulevard for testing on the third Saturday at 10 AM.

Till next issue, 73's

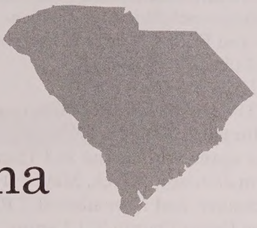
South Carolina



Roger Gregory, W4RWG

Hello South Carolina,
As I start writing this, I just got back from the Shelby, North Carolina Hamfest. I saw a lot of SERA staff there. Tom and Jean Marie Gallagher were running the SERA booth, I also spoke with the Kentucky Director Mike McCowan, Georgia Director Terry Jones, North Carolina Assistant Director Bob Lukaszewski and, of course, Jim Cantrell the South Carolina Vice Director and I were in the boneyard. There may have been more SERA staff there, but I didn't see them. Shelby is probably the largest hamfest in our part of the country. The weather was just great and I enjoyed seeing and talking to the SERA staff.

Madyson Anne Conard, our first grandchild, was born on Tuesday September 5, 2006. She came here at 8 pounds and 1 oz. Mother and baby are doing fine. I had asked my daughter to hold off until after the Shelby Hamfest was over and she did. My wife Kathy has decided to retire after 30 years with the State of SC and do the daycare thing.

The **Anderson Radio Club** recently had a presentation on the Civil Air Patrol given by Ralph Driver, KC5GPM, and Jim, KD4HEY, talked about snakes. The ARC earned a score of 4760 points for field day. The ARC welcomes new member Floyd Wilcox, KG4YCY, of Norris, SC. On August 13, Jimmy, WD4BUH; Mike, KJ6XE; Steve, N4SZ; Kathy, N4meh; Darrell, LI4BST; Jeremy, KI4CCZ; Leon, KE4HZN, and Jim, KD4HEY, all went to the 146.790 repeater site on Sassafras Mountain for periodic maintenance and repeater upkeep.

The Blue Ridge Amateur Radio Society:
The Greenville WCARS VE team gives exams the first Saturday of each month at the Red Cross Building on Grove Road. The contacts are John Chism, ND4N, or Sue Chism, N4ENX (n4enx@mindspring.com).

The **Charleston Amateur Radio Society** welcomes new members William Olendorf, K4KOA; Robert Jennings, KB4FZE; Charlie W. Miller, AE4UX; Raymond Borelli, W9RKF; Terry Fox, Wb4JFI; Paul Matthews, KB4GYT; and Robert Besley, K4NJN. The CARS holds ARRL testing the second Saturday of even numbered months. A group of hams in the Charleston area have started a PSK63 net. The Low country 2-meter USB PSK63 net meets every Wednesday at 8 PM and every Sunday at 9:30 PM. On 144.145 USB mode.

The **Columbia Amateur Radio Club** hosted an antenna building class on August 19. Two meter twin lead roll-up j-pole antennas were made for about $5.00. Jack, K4CUB will be teaching a code class beginning October 10. For more information contact wjs46cub@sc.rr.com. The CARC repeaters 146.775, 147.330, and 444.22 all have a pl tone of 156.7.

The **Florence Amateur Radio Club** heard from Mike Wells, WA4HVP, about the HEARTS Radio System which is now operational in the Charleston Area and hopefully will go statewide. Some of this is being funded under Homeland Security. Members of the FARC are planning on a bus trip to the Dayton Hamfest next year. I am thinking about going to Dayton, too. The FARC recognizes a father and son; Jerry Jebaily, KI4OEU, and Gerald Jebaily, KI4LJT, as members if the Month. Aside from Amateur Radio, they enjoy salt water fishing, model trains, hunting, and restoring old automobiles. The FARC meets the first Monday each month at 7 PM.

The **Foothills Amateur Radio Club** will be moving the location of their Hamfest. Next year it will be in March. More later when we know the location. The FARC will have a picnic on October 1 at Amor, N2FY, and Judy's. Gretchen, KE4HGX, and Jennifer, KG4YDC, are co-coordinating the sides. The FARC holds their meetings at the Main Street Café in Six Mile.

The **Greenwood Amateur Radio Society** extends their sympathy to Jim White, KF4YK, for the death of his wife, Freddie, who passed away on July 7. Sympathy is also extended to B.J. Johnson, W4BJJ, in the death of his daughter, Mia Johnson, who passed away on July 11. The GARS welcomes new member Bill Yoder, KI4QHQ. The GARS holds a weekly net each Thursday night at 9 PM on the 147.165 repeater. The GARS has a website at www.w4gwd.org.

The **Laurens Amateur Radio Society** has a net on their Club Repeater 443.900 (tone 107.2) every Tuesday night at 8 PM. Check in with Ms. Alice.

The **Pickens County Emergency Communications Group** had a presentation on August 8 on Tornados and Tornado Chasers presented by Eric Sloan, KO4MZ. A Special Guest attended Field Day on June 24; State Senator Larry Martin. Members of the PCECG helped with the Annual Pumpkin Town Festival in Pumpkin Town, SC.

The **Salkehatchie Amateur Radio Club** wishes a speedy recovery to Gerry Paulk, Bill Riley, and Bill Wetzel. All have been sick and are recovering. The Barnwell EOC hosted an Emergency Personnel planning workshop on August 4. The subject was catastrophic flu epidemic. The SARS was glad to be included in the activities.

The **Spartanburg Amateur Radio Club** welcomes new members Randall Runion, N4LCV,John Gunderson, KB1KQP; and Joe Brock, KE4HN. They also welcome back Charles Greeson, AF4CK. The SARC annual "get together" will be October 28. This year it will be held at the Spartanburg Fairground and will be held at 6 PM. The event will be catered by Mutts Barbecue. I see that my friends Nett Hembree, KFYQT; Malcom Cromer, N4SEJ, and Juanita Cromer, N4SEK, have been in the hospital. I wish them a speedy and full recovery. The SARC had a program on Radar Bomb Recovery by Dave, KN8Y. The annual Christmas Party will be held December 5 at the Golden Corral. The SARC holds on the air meetings each Monday, Wednesday, and Friday at 8:30 PM on the 147.315 club repeater.

Hello Fritz!

The **Union County Amateur Radio Club** WCARS VE Team holds exam sessions the 2nd Thursday in January, March, May, July, September, and November at 7 PM in the Union County 911 Center training room on North Pinckney Street in Union, S.C. Contact Jim, WJ4C, for information, wj4c@charter.net.

Attention South Carolina Repeater Owners. Are you a SERA Full Member? I would like for you to consider joining the SouthEastern Repeater Association. The cost is only $ 20.00 per year. Send your full membership dues in today. Let's make South Carolina 100 %. SERA needs your support and with full membership not only will you support the SouthEastern Repeater Association, you and your designee will receive the Repeater Journal for as long as you are a full member. What a deal!

Would you like to see news from your club in the journal? It's easy! Tell your club Secretary to make sure I am on their newsletter mailing list.

73,
Roger W. Gregory, W4RWG
SERA President, SC Director

Virginia

Fred Weaver, KG4BKI

That Wytheville Ham Again

I received an e-mail from Dennis Alford, KC4VGA, on the 31st of August to tell me that the case against him had been dismissed. He also said he had to turn over the radios he had that could cause interference. I sent back that I was sure he was happy not to be in jail.

Readers will recall that Dennis is the Amateur who was accused of interfering with the Wytheville Police Department dispatch center. It was not an FCC violation. He was charged under Virginia statutes; including a felony charge that could have landed him in jail for six years.

I was pretty sure that his having to give up his property indicated that 'dismissed' was not really the correct term. Peter Vieth, KB4FVJ, has been observing this case and sent a copy of the case details.

The felony charge was 'nolle prosequi' – not prosecuted. This leaves open the option, for the prosecutor, of refilling the charges at a later date. The misdemeanor charge was 'continued' with another hearing scheduled for August 30, 2007. So, the disposition of the misdemeanor charge would appear to depend on Mr. Alford's behavior for the next year.

Well, my readers, I would like to tie a better ribbon on this report. Did KC4VGA use modified radios to intentionally interfere with the Wytheville dispatch center? In my previous columns I reported that Detective Gary Davenport of the Wytheville PD told me the interference to the dispatch center stopped with the seizure of the modified radios. The rest is between Dennis Alford and his attorney.

Pending a favorable outcome of the 2007 hearing, Mr. Alford will not have a conviction on his record to affect his Amateur license status.

Roanoke Valley Hamfest

Ahhh, my bi-annual trip to the Roanoke Valley Hamfest in Vinton. Nice 'fest!! This is an opportunity to get together with my SERA colleague Don, W4VT, and to bump into my friend Morgan Welker, KG4BQI. The 'fest is conveniently located just off the Blue Ridge Parkway and it is a nice drive going to the event.

The weather was favorable and the tailgating area looked just a bit more robust than I recalled from my last visit. A good sign. Indoors was about the same I recall from my last visit. The event is not large as these things go, but well organized and has a pretty good representation of ham gear.

I continued my string of winning door prizes and received a nice UHF antenna. (I'm pretty sure they aren't setting me up!!)

The organizers have free bingo with some good prizes. This gives a nice diversion for those not as interested in browsing as their companion might be.

Also met the new Virginia Section Manager, Glen Sage, W4GHS, and attended the ARRL/ARES forum. Glen gave a very nice presentation making a special point to describe the geographic challenges facing the organization in a Section as large and diverse as Virginia. He proposed to use 'zones' throughout the state with a person in each zone with the authority to speak for the SM. ARRL members should refer to their own publications for more info on that proposal.

Glen also talked about ARES and indicated that much of the section work 'funnels' back into ARES. He described how important he thought it was for ARES to work closely with local clubs.

Very nice day at the Roanoke Valley Hamfest and looking forward to going back in a couple of years!

Virginia Beach Hamfest

The weather was not as cooperative with the VB Hamfest as it might have been, but they did not attract a hurricane as they have done several times in the past. The tailgating area was booked full and it was necessary to move some tailgaters into an adjacent parking lot. Filled to capacity is always a good sign for the health of an event.

Indoors was well filled and it was again necessary to move the club tables into an adjacent hallway as was the arrangement two years ago. The set up at Virginia Wesleyan College is very convenient as there is an area adjacent to the hall where the vendors are located with tables and chairs that make a nice place to sit down and talk with your friends.

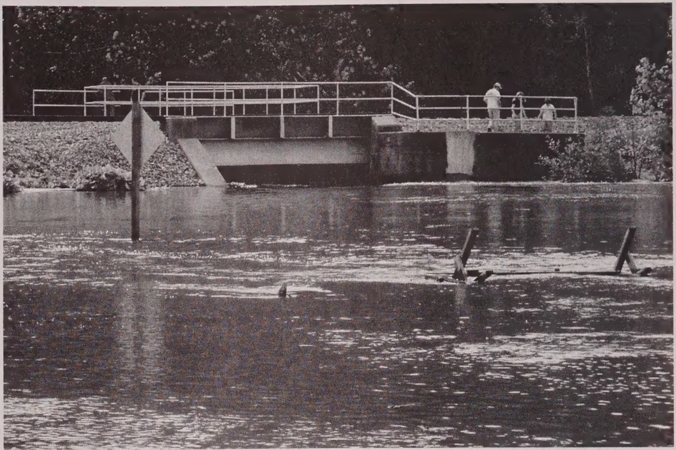
Attended one forum event at the VB 'fest – ARRL. I'm not an ARRL member, so going to the various forums at the hamfests is a way for me to see what is going on. Les Shattuk, N4NK, Vice Director, Roanoke Division, made a presentation relative to the "Grass Roots Initiative." The idea is to train a select group of Amateurs to make face-to-face presentations to Congressmen and Senators on issues affecting ham radio. Les indicated that there was an application package on the internet. Working with a known group of trained presenters, a consistent message would be transmitted to your local legislators.

Again a good event and I'm looking forward to next year.

Western Tidewater Radio Association at the Isle of Wight County Fair

The WTRA had a booth in the 'non-profit' tent at this year's IOW County Fair. This was an inaugural effort, so they had to feel their way along relative to their presentation. The decided not to try to make an elaborate radio demonstration and instead concentrated on video presentations of club activities and emergency communications.

They did get a few people to sign up to indicate their interest in a class. Hope that part goes well.



View of the railroad underpass in Zuni near the crest of the flood.

Unnamed Nor'easter Makes Big Splash

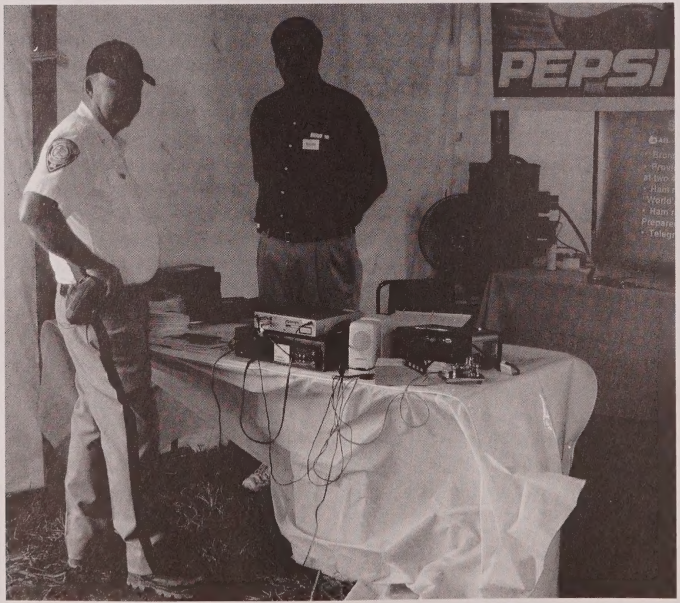
Just at deadline an unnamed Northeaster hit the southern part of Virginia with a vengeance dropping 12" of rain in some places. My neighbor here in Zuni recorded over 11". Most of the rain fell on October 6. Runoff closed many roads on October 7. Then the runoff hit the Blackwater River.

On Saturday evening the river level was at about 13'. I thought I would go down to the river to check the level. No need – the river had come to me! At that time the level was over 17' and looking like it had intentions of coming on up. It did. At the U.S. Geological Survey gauge on the Blackwater (About 6 miles upstream from Franklin) the river crested at 22.77 feet on Monday.

Shades of Hurricane Floyd! But, there were basically no issues with electricity, phones, and internet. There were some people who needed to evacuate their homes. The shelter in Franklin was open for 15 people, and Smithfield High School (IOW) was opened as a shelter. Amateur radio communications were not requested at any of the local jurisdictions. I think the mitigation efforts following Floyd (1999) have paid off.

Governor Tim Kaine declared a state of emergency for the affected areas.

For reference, Hurricane Floyd (1999) set the record for the Franklin gauge – 26.4 feet. The old second place crest was 22 feet in 1940.



Dick Harrell, W4RBH, talking with Charlie Phelps

Historical Crests

(From NOAA website)

(1) 26.40 ft on 1999/09/20 (Floyd)
22.77 ft on 2006/10/09
(2) 22.00 ft on 1940/08/19
(3) 17.14 ft on 1960/09/14
(4) 16.84 ft on 2003/09/22 (Isabel)
(5) 15.61 ft on 2006/09/4 (Ernesto)
(6) 15.27 ft on 1998/02/7
(7) 14.97 ft on 1963/06/6
(8) 14.42 ft on 2003/04/13
(9) 14.21 ft on 1975/03/22
(10) 13.83 ft on 1994/03/5

Note that two years, 2003 and 2006, have now accounted for four of the historic crests. Got boots?

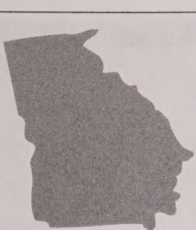
Georgia



John Talipsky, N3ACK

Another year is about to conclude and I would like to thank everyone who has offered items for me to post here for other repeater owners to read. Keep the news coming as well as any photos of events you may have participated in or attended. If you would like to see anything in particular posted in this column on an ongoing basis please get with me and we'll arrange to make it happen. Happy holidays to everyone. Let's get 2007 rolling with a bang, get me those news stories and pictures of those holiday parties!

Club News

Atlanta ARC --- Work on the new D-STAR repeater is moving along nicely. Robin Cutshaw, AA4RC, has made much progress and reports the repeater is getting a much stronger signal out. If you have a digital radio, point it at the 145.35 repeater on top of Stone Mountain. Elections were held recently, and congratulations go out to the following slate of officers: President- Jim Farmer, N4IBW; VP- George Lane, KI4DSO; Secretary- Jack Bolton, WA4PNY; and (long-serving) Treasurer- Charles Golsen, W4CHG. Best wishes for a successful and enjoyable year leading the club.

Columbia County ARC - The CCARC once again participated in the 18th Annual Oliver Hardy Festival in Harlem GA on October 7. The CCARC operated under the ham radio station call sign W4O (O for Oliver Hardy) both at the festival site and at a few hams home stations. Hopefully, we'll have a few good photos for the next issue of The Repeater Journal.

Ellijay ARS - Despite a good amount of rain, the Ellijay ARS produced a successful hamfest in September. Hams from around the southeast converged on the tiny little town of Ellijay in the northeast corner of the state up I-75. This was a free event and all who attended had a great time. The Grand Prize winners were William Dobbs, K4TSF, of Tennessee, who won an HT, and Martha Houston, KB4RCQ, of Dallas, GA, who won a mobile rig. Congratulations on a fine hamfest.

Gwinnett ARS - The Gwinnett Amateur Radio Society has announced its upcoming Techfest for January 13, 2007in Lawrenceville, GA. This is a free event. Set-up around 9 AM, start at 10 AM and lunch is served with the Great GARS Chili Cook-off around noon.

We hope to demonstrate fellowship, HF, VHF, UHF, QRP, digital communications, CW, antennas, portable operations, PCB drawing, Satellite Communications, electronic gadgets, Club and Ham Services, our association with the ARRL, Gwinnett ARES Emergency Response Vehicle and great lunch of chili and hamburgers. Folks wishing to demonstrate some facet of Ham Radio should reserve a table due to space limits. Be sure to invite your non-ham friends. This should be a great family experience and a time for some of our younger citizens to become interested in the Magic of Amateur Radio. For more info: www.gars.org.

Newton County ARES - On Saturday, September 9, 2006, the Newton County ARES group provided communications support for the 23rd Annual Covington Police Fuzz Run. Covington Police Department Lieutenant, Ken Malcom, said that there were 2266 participants combined in both the one mile "Fun Run", which began at 8 AM and the 5K Run, which began at 8:30 AM. He commended the Newton County ARES group for the excellent support and traffic control at various intersections along the route. The information they provided was used to keep race officials informed of the progress of the runners. The group members were also vigilant for anyone along the race route who needed medical or other assistance.

Participating were Carl, AG4LS, EC; Jay, KD4QOV, acting NCS; and Lee, KI4QLV, acting ANCS. Others participating included Cameron, KI4KJR; Scott, KI4NWC; Charles, WA4UJC; Greg, KI4NWD; Randy, KI4NWE; Joe, W8TSP; Brian, KI4JIL; Sick, W2HOV; Jim, K4DOI; Les, WA4ENC; and Joe, KI4AHI.

Georgia ARES

MAJOR EXERCISE - Greg Tillman, N4VAD and ASEC for Operations announced that the 165th Air National Guard Medical Unit of Savannah, GA. has asked that Amateur Radio be incorporated to their drill September 20, 2006. The main drill was scheduled for 72 hours. However, they only asked for ARES to be there September 20 to demonstrate its abilities to upper echelon levels of the Government that day. The Drill will start around 0700 hours local Eastern Time. The drill is scheduled to last until approximately 1900 hours local Eastern Time but we may be called to stand down prior to that. The Drill will incorporate having simulated patients that will be triaged, treated and transported by C-130 aircraft from the disaster site. Without giving a lot of the scenario away there will be multiple emergencies taking place. There will be no power, no cell phones, and no Internet from Savannah outward to three or four counties depending how big the scenario gets. These emergencies will cover a range of possibilities.

A net will be conducted by Charles, K4GK, on 3.975 LSB and, band conditions permitting, 7.275 LSB. Both frequencies are used by GA ARES during an emergency. Even though conditions may not be good we still need to check our communications capabilities there as well. Check-ins will be taken on the top of each hour as needed, time permitting depending on the amount of message traffic to be passed. EC's of each county can assign someone to call a local area net on VHF and have the number of check-ins relayed via Winlink or SSB to the Net Control Station.

ARES has been asked to pass various types of messages and traffic out of the disaster area (Savannah) area to Tift Co. ARES (at Henry Tift Airport in Tifton, GA) and to Cobb Co. ARES for messages to Dobbins Air Reserve Base's Joint Operations Center.

Winlink will be a part of this exercise. Anyone wishing to participate in the drill via Winlink can send a message to n4pjr@winlink.org. These check-ins will be added to the count for this drill. If you do check in via Winlink, please indicate your location at home or work and the source of transmissions i.e. Internet or VHF packet into Telpac or pactor to PMBO, etc.

CAT-200 Repeater Controller

This controller was specially developed to provide remote base linking operation and a voice synthesizer at an extremely affordable price.

Features Include:

- *Voice Synthesizer ID*
- *(12) Voice Messages*
- *CW Identifier*
- *Beacon Message*
- *Remote Base Port*
- *DTMF Audio Muting*
- *DTMF Pad Test*
- *(30) Control Functions*
- *(4) Logic Inputs*
- *(4) Output Switches*
- *Optional Peet Weather Station Interface **
- *Optional Windows ® Editor Program **

** Requires CI-200 Computer Interface*

Ordering Information

CAT-200** Controller Board, Wired & Tested **$199.00
RME-200L** Rack Mount Enclosure **$49.00
CI-200** Computer Interface and Windows Editor **$59.00

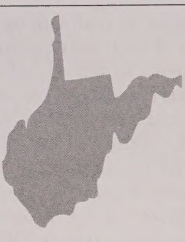
West Virginia



Richard Clemens, KB8AOB

Greetings from West Virginia

As I write this, the air outside has turned cool and crisp, the evenings are getting all too short, the campaign ads are flooding the television screen and nearly every corner in town has a political sign. It seems the time goes by so fast that we seldom have an occasion to visit with our family let alone our amateur radio friends. For that reason I always try to make the extra effort each summer to attend the "The Mill."

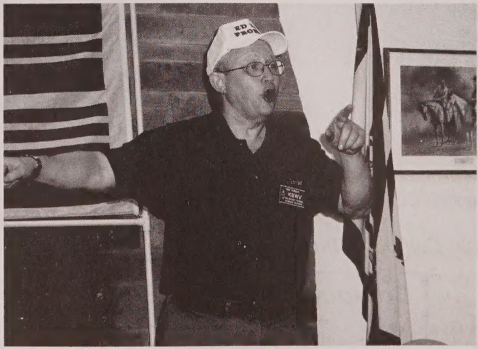
For those of you that reside out of the state, let me explain. "The Mill" as it affectionately known by West Virginia Amateurs is the site for the annual West Virginia ARRL Convention. This year was the 48th annual event and as usual it provided an opportunity to greet fellow amateurs from around the region, swap stories and equipment as well as attend a number of helpful workshops and presentations. I have been attending the happening since the mid 80's and must admit I find it one of the most enjoyable ham events of the summer. "The Mill" provides an incredible atmosphere for learning new techniques, solving problems and just visiting.

"The Mill" is actually Jackson's Mill, a grist mill built in western Virginia (now West Virginia) and the nearby home of Edward Jackson. Cummins Jackson, Edward's son, operated the mill after his father's death and looked after an orphaned nephew and niece due to the death of Cummins' brother and his brother's wife. The nephew was to become one of the most famous generals of the Confederacy, Stonewall Jackson. Today the site is often referred to as the boyhood home of Stonewall Jackson and it now contains a number of buildings, exhibit halls and even a small airstrip. The grounds are used as a 4-H camp and as the site for a number of other youth and adult groups as well as craft and music events. The old grist mill has been rebuilt on the property and serves as the centerpiece of a historical site and museum. The compound also serves as a special campus of West Virginia University that is located approximately 60 miles to the north in Morgantown, WV.

In 2008, The Mill will host not only the 50th annual West Virginia Convention but also the ARRL Roanoke Division Convention on August 22-24. That will prove to be an exceptional chance for you to not only enjoy the company of amateurs in the region but to witness for yourself the wonderful countryside that abounds in this state.

One visitor to The Mill that I expect to see every year is ARRL Laboratory Manager Ed Hare,W1RFI. Ed has attended the events at The Mill for a number of years – even to the point he has been duly accredited as an Honorary West Virginian. Each year he finds his way from his home in Connecticut to West Virginia and, based on his conversations and interaction with the visitors, he would be happy to move the ARRL Laboratory to Jackson's Mill as well.

His attendance at this year's event was no exception. He provided a talk on the status of BPL to a capacity-filled hall and gave us an insight regarding the issues that are faced as part of this new technology. He was also a key participant in the evening auction that is held to help raise funds for the West Virginia State Radio Council. Dan Ringer, K8WV, serves as auctioneer and manages to squeeze money out of individuals that didn't even know they wanted the item up for sale. Besides a grand collection of items that never sold at the day's hamfest and that are about to find rest in a nearby dumpster, there is always a prize. This year's prize item was a hat from Ed Hare that announced "Ed Is A Problem" [referring to his stand with utility companies on BPL].



K8WV announces "SOLD" to yet another unlucky winner (while wearing Ed's Problem Hat)

In the early afternoon I had a chance to visit with Alex Hedrick, N8FWL the SERA Secretary, Internet Manager and the WV SERA Director and Frequency Coordinator. Needless to say this fel-

W1RFI and K8WV visit at the WV ARRL Convention and Hamfest

low eats and sleeps SERA! Alex, several others hams and I held a very productive session during the afternoon while gathered on the front lawn of the WV Building at The Mill. We were able to resolve a number of concerns and talk about issues that involve all amateurs in our state. Alex is very anxious to clean-up any problems that might exist in the frequency database and that is where you can help.

As part of his real job, Alex travels the mountain state and has a first hand opportunity to access the various repeaters in the state and check on the parameters that are listed by SERA. As part of our discussion, Alex brought out his laptop and updated several records to reflect the current status of a number of area repeaters.

As you use repeaters in West Virginia please take time to check your experience with the information printed in SJ. If you find any contradiction in the data, make a careful note of the differences and provide Alex with a written record of the concerns and the issues.

If you are responsible for the co-ordination of a repeater, be sure your reporting is current and you have indicated any changes, improvements, or deletions since the last printing. While Alex certainly must deal with these items, you can make his job much easier by having accurate timely reporting and in writing!

As a footnote to earlier articles on these pages – let me direct you to a series of online podcasts that I believe you will enjoy. In particular, a 1996 interview with Grote Reber is available at: www.gb.nrao.edu/epo/podcasts.shtml or just Google -- Grote Reber Podcasts -- and you should find the listing. In the interview he reflects on his early days in Radio Astronomy including his experience with Amateur Radio. There are several other podcasts on the page that are equally interesting.

10th Annual

Catawba Valley Hamfest and Computer Fair

Burke County Fair Grounds
Morganton, North Carolina
Saturday
April 21st, 2007

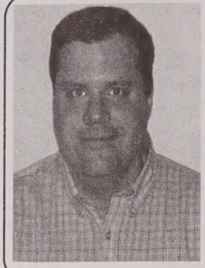
To all of our attendees, thanks for making our 2006 Hamfest a big success! We hope to see all of you again next year.

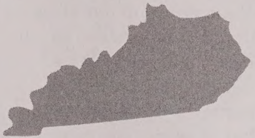
Remember to bring all of your friends!

Congratulations to the BIG Winners for 2006:
Grand Prize - Icom IC-746 with Power Supply - Charles Davis, KQ4RN Old Fort, NC
First Prize - Dual Band Mobile - Dana Stranger, KI4OCW, Greer, SC
Second Prize - 2 Meter HT - Roger Grindstaff, KI4FPC, Arden, NC
Early Registration Prize - $100 Hamfest Bucks - Winston Small, KC4LLV, Morganton, NC

- **Put your name here next year! We'll see you on April 21st, 2007!**

Web Page: http://www.cvhamfest.com





Kentucky

Pat Spencer, KD4PWL

School is back in session, the days are growing shorter, and the cold season is upon us. I trust you are well, and have your antennas winterized.

The **Mayfield Amateur Radio Society** has placed two repeaters on the air in Graves County under the KF4GCD callsign. David Forbis, KD4DVI, SERA Kentucky West Assistant Director reports to the Repeater Journal that the 224.820 (Tone 179.9) and the 441.875 (Tone 179.9) are under active coordination.

Three miles south of I-64 in Grayson, KY, on the top of a 45-foot Rohn tower is the **KD4DZE repeater.** Eleven hundred feet above sea level, the 146.700- (Tone 107.2) repeater is comprised of Icom Business Band radios, a CAT Controller and a new set of TX RX Duplexers. Bill Eldridge, KD4DZE, has linked this repeater to the 147.135+ (Tone 107.2) repeater in Elliott County. Future plans include a link to the 444.600+ (Tone 88.5) repeater also in Elliott County. The repeater has weather alert capability and Eldridge encourages all amateur radio operators to use the repeaters when in the area.

The **Kentucky Emergency Net** will change frequencies effective October 2, 2006. The net will continue to be called Monday at 7:30 PM ET. The new frequency is 3.972.5.

There will be a changing of the guard in the Kentucky ARRL Section Cabinet. Section Manager John Meyers, NB4K, will not be placing his name on the ballot for the upcoming election citing illness. Meyers will serve the remainder of his term, which ends Spring 2007. Commenting on his three terms in the office, he said, "I have enjoyed every endeavor that I have faced, be it difficult or easy. There have been many changes made in the Kentucky Section. All the changes that were made had as much thought, consultation and research as possible. Every staff member played an important role and I am truly a lucky person to have been able to put together this outstanding team. I thank them for their interest and dedication to the hobby."

The deadline for nominations to be placed on the ARRL ballot is December 10, 2006. Meyers will work with his successor to ensure a smooth transition. He counsels those who may have interest in the Section Manager position, "It would be difficult for a person who works 40 hours a week to maintain the time and energy that needs to go into this position. To travel from east to west in the Commonwealth takes about 8 hours and north to south about 3 hours." He added that he receives 45-70 emails per day.

Joining Meyers in passing the torch after eight years is Kentucky Section Emergency Coordinator, Ron Dodson, KA4MAP. After eight years in the position, Dodson states that professional obligations as Meade County Emergency Manager present him with a challenge to be able to fully serve amateurs and their served agencies across the Commonwealth. "These last several years (post 9/11), I have not had what I considered the time to do the job to my personal satisfaction. Our changing world is placing more and more demands on me from the paying job world and I feel it is best to let someone else jump in before our program suffers." Dodson would like to see the forward progress of the KY ARES program continue. Disavowing credit for the progress of the program, he said, "I have enjoyed working with everyone in the past eight years building the KY ARES program."

Kentucky Governor Ernie Fletcher appointed Anderson County ARES Coordinator Director of Public Safety for Anderson County and Emergency Management Director for the City of Lawrenceburg, Charlie O'Neal, KE4AIE, to the Kentucky Wireless Interoperability Executive Committee. The committee was founded to make recommendations to Homeland Security on initiatives related to data and voice communication interoperability between public safety first responders. Fletcher wrote to O'Neal, "I have every confidence in your abilities to serve your fellow Kentuckians with the honor and distinction they deserve." He joins another amateur radio operator, Kentucky Department of Military Affairs Communications Supervisor Bob Stephens, WA4CMO, on the committee.

Kentucky amateur radio operators were called to serve many communities and the state on the weekend of September 23-25. Heavy rains from five to ten inches in a 36-hour period, forcing 20 counties to declare a state of emergency, took ten lives and caused several million dollars' damage. Flooding caused disruptions of phone and Internet systems. Two locations affected were the Kentucky Emergency Management Center and the Hardin County 911 Center. KY Section Emergency Coordinator Ron

Dodson, KA4MAP, summed up the activity. "All phone communications to the state EOC went down as early as 2 AM Saturday morning, returned and then went out a second time around 5 AM. I was contacted to activate the HF Kentucky Emergency Net to provide support communications into the state EOC from Kentucky's 120 counties."

Dodson continued, "Around 10:30 AM state EOC phone service was restored but **Kentucky Emergency Net** remained in operation on 3.993.5 MHz. as heavy rain again entered the western areas of the state. Within minutes, Shelby Ennis, W8WN, of Hardin County, Kentucky reported to Dodson via the 146.625 K4ULW repeater that all phone service to include the Hardin County E-911 facility had gone down in their community. Cell phones soon overloaded and also shut down basically stranding the whole county without outside contact except via amateur radio. Over the next several hours, communications between the state EOC and Hardin County were established via the Brooks, Ky. 146.700 KY4KY repeater operated by the **Bullitt Amateur Radio Society.**"

"The American Red Cross headquarters in Louisville also used this machine to communicate with their shelter which was established and the Hardin County Emergency Management Building. While command and control communications were conducted via the 146.700 KY4KY repeater, other operations were conducted over both the Elizabethtown 146.98 W4BEJ repeater and the neighboring, Meade County 146.625 K4ULW repeater. Jefferson County EC John Hesse KF4IZS reports that operations continued on Sunday for more damage assessment details in Louisville and Fisherville in Spencer County."

In Central Kentucky, Woodford County EC Jerry Mueller KC4WZO was contacted by American Red Cross to provide amateur radio operators for communications in Millville. Located in a deep valley, the community does not have reliable cell phone coverage. Responding to the need were Pat Compton, KF4FMZ; Paul Harrington, KB4ENQ; Rob Hutchinson, KI4ODT; and Jerry Mueller, KC4WZO. The operators provided communication assistance and helped deliver meals, drinking supplies and ice to the affected area.

Dodson reported that, "Bob Stephens, WA4CMO, Communications Supervisor for the Kentucky Department of Military Affairs, informs me that The Kentucky Adjutant General, LTG. Donald Storm and MG. Maxwell Bailey, Director of KY Division of Emergency Management were pleased with the way amateur radio functioned in providing communications when all else failed to work. They extend their thanks to those amateurs who gave of themselves in this effort."

Other repeaters active in the event were the Lawrenceburg 147.105, K4TG; Lexington 146.76, K4KJQ; Louisville 147.180, W4CN; Louisa 147.390, N8QCW; Mammoth Cave 146.940, KY4X; ; and the Madisonville 146.610, KC4FRA.

If you have Kentucky amateur radio or repeater news, please contact me at the address in the masthead. If you are new to Kentucky or a new licensee looking for local information or amateur radio sources, check out **www.kyham.net.**

HI PRO REPEATERS

Hi Pro "R1" Repeater
144 MHz, 222 MHz or 440 MHz
Here is a compact **LOW COST** repeater (less controller) priced at just $699.
A 35 watt VHF (2-meter) repeater with a computer controller, voice synthesizer, auto patch, auto dialers, user functions, etc. is priced at $1,179. This is not a kit, but a complete repeater with a two-year warranty. 222 and 440 MHz versions are also available!

Hi Pro "E" Repeater
144 MHz, 222 MHz or 440 MHz
The Hi Pro "E" is the choice if you need a repeater with a built-in power supply, plus room for an extra receiver, transmitter, small duplexer and controller. The front panel provides status indicator lights, a speaker, a microphone connection, control switches, etc. Prices start at just $1,450!

If you need a receiver or transmitter as a board or in an enclosure, we can provide them. These are the same high-performance units that are used in all of our repeaters. All have our new QUALITY AUDIO AND STABLE OSCILLATORS.

EV1 VHF Transmitter
RV4 VHF Receiver

Visiting High Places In North Carolina

Frank A. Lynch, W4FAL

For this edition of the Repeater Journal, I thought a story about High Places in North Carolina would be interesting. Many of these high places are also home to some of North Carolina's repeaters.

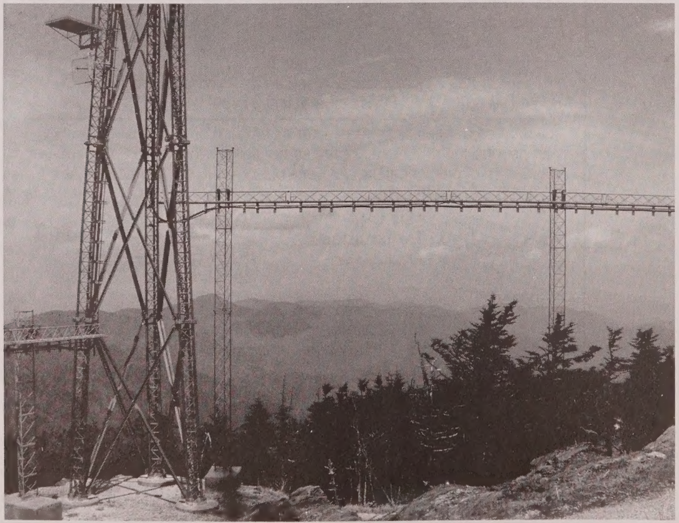
Let's start out with some "naturally high" locations that are geographical in nature. The highest point east of the Mississippi is Mount Mitchell. It's located near the town of Burnsville, NC in Yancey County. Geographic coordinates are 35°45′53″N, 82°15′55″W

The mountain's summit is 6,684 feet above sea level and is named afeeter Elisha Mitchell, a professor at University of North Carolina who in 1835 first determined its height. Mitchell fell to his death at nearby Mitchell Falls in 1857.

Mount Mitchell is now a State Park with easy access from the Blue Ridge Parkway most of the time. The summit has an observation tower and also the tomb of Dr. Mitchell.

There are no repeaters at the summit of Mt. Mitchell, however about 2.4 miles away is Clingmans Peak. It's the home of several FM stations and numerous land mobile, public safety, and amateur repeaters. The tower at the site is a rugged self-supporting tower 184 feet in height.

The ground elevation at the site is 6,561 feet making the tip of the tower 6,745 feet above sea level. I believe that makes the top of the tower the highest man-made object east of the Mississippi.

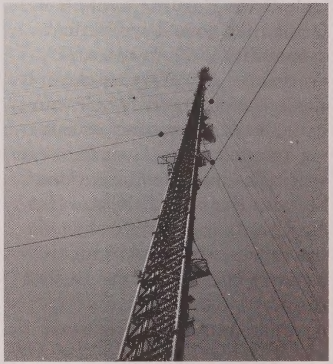


Amateur repeaters that are located at the site include;

53.6300	N4YR
145.1900	WA4BVW
224.5400	WA4BVW
442.2250	N4YR
443.6000	N4DWU

With a height above average terrain of just over 3,000 feet this site provides for extremely wide area coverage. A couple of these machines have been on the air from this site since the early 1980's.

One thing that one doesn't see from the most part in western NC, due to the many mountains that have antenna sites, are really tall towers. I'm talking about those that are between 1500 and 2000 feet tall and that look like this.



Another shot from a platform at about 1200 feet (below) shows SERA's K4HA doing his day job with the North Carolina Highway Patrol.

This picture was taken in the summer months. During the winter months with the wind that blows at these high elevations, Bob would have been wrapped up

to the point no one would have recognized him.

In North Carolina, there are 18 towers, with heights ranging from 1,500 to 2,000 feet. These generally fall into my definition of tall towers. All of these were built for broadcast (FM and/or TV) service. Many are in hurricane zones, and all are guyed structures some having face sizes as large a 12 feet across. Most of these have elevators that allow service people to ride up the tower rather than climb. Many have "platforms" that allow communication gear to be actually placed up on the tower thus minimizing the length of coax cable runs.

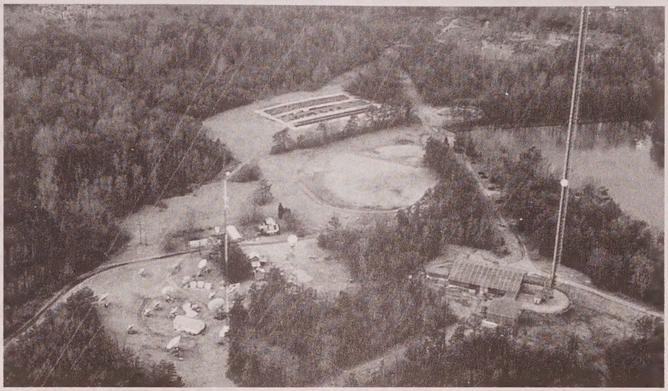
Locations include, Columbia (above), Trenton, White Lake, Middlesex, Clayton, Auburn {3 towers}, Broadway, Apex, Level Cross {2 towers}, Dallas {3 towers}, Cool Springs, Mooresville, and Alexis.

Not all of these have amateur repeaters on them, but some do. Many also are host to a myriad of other communications gear that serves business, city and county agencies, state agencies and federal agencies.

A view from about 1,500 feet on one of the Auburn towers is at below.

Some reading this will remember the severe ice storm in December of 1988 that caused the collapse of the former WPTF-TV tower that was at the location this picture was shot from and the WRAL-TV tower that is in the right side of the picture. The collapse of both towers completely destroyed the transmitter buildings at the base of the towers. This photo taken in 2003 was afeeter the reconstruction of the towers and transmitter buildings.

Next time we will take a look at another SERA state and visit some of the high spots there.



COMMERCIAL REPEATERS FOR AMATEUR USE !

Trade in your old repeater on a new 2 meter, 220 or 440 factory fresh commercial repeater.

With wattages available of 5, 25, 40, 50, 100, 180, or 400 watts of output. Complete packages available that include repeater, full featured computer controller, amplifier, preamplifiers, power supply, circulators, duplexers, cabinets and even hard lines and commercial antennas.

** Our repeaters sound good and hear good **

Technical assistance always a pleasure.

Please come and join our technical assistance reflector on the world wide web (a free service). Information available from licensed E.E.s and P.E.s all repeater, lines and antenna technical issues.

THE SERA OFFICIAL REPEATER INDEX

REPEATER LISTINGS FOR: GEORGIA ■ KENTUCKY ■ MISSISSIPPI ■ NORTH CAROLINA ■ SOUTH CAROLINA ■ TENNESSEE ■ VIRGINIA ■ WEST VIRGINIA

IMPORTANT NOTICE: The SERA ***Repeater Journal*** is Copyright 2006 by the SouthEastern Repeater Association, Inc., the officially recognized Amateur Radio Repeater Coordinating organization for Kentucky, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, Virginia and West Virginia.

The SERA ***Repeater Index*** may NOT be published or reproduced, in any form, by any individual, publication, electronic source, or any other means, for distribution without the expressed written consent of the SERA, Inc. All other rights reserved.

SERA will not be responsible for incorrect or omitted listings. The responsibility of correct listings is that of the actual repeater owner or sponsor. SERA makes every effort to keep the index as accurate as possible with information provided. The SERA ***Repeater Journal*** repeater lists contain certain repeaters which are NOT or have not been coordinated by SERA, or are not operating according to recognized frequency utilization plans. SERA does not necessarily condone or recognize such repeaters as being legal or illegal. They are listed in our indexes primarily to keep our readers informed of all repeaters known in the areas served by The SERA.

Some repeater owners or sponsors allow voice as well as other functions on their machine. Operators should check with owners for additional information about what is allowed, and what features are available. Digital Repeaters with normal input/output (pairs) are listed in the regular FM repeater index. Digital systems operating simplex are not coordinated by SERA and are not on our repeater lists. The *codes* column contains the tone or access code for those repeaters which the owner or trustee has given us written permission and asked that we publish them . Access tones are listed for the reader's convenience both in the By-State, and the By-Frequency listings.

Entries with "#" in front of city indicates repeaters added to this index that have not been coordinated through the local SERA state coordinator. Owners may work with their coordinator to get this indicator removed. Repeaters that have been coordinated but may not yet be on the air yet are listed with "PROP" in the codes column. Owners should notify SERA when on the air.

Repeater owners are reminded to contact their local Frequency Coordinator for assistance in coordination, changes in their listings, or any other requirements. All SERA services are FREE. It is very important that the annual SERA repeater datasheet, sent to all known repeater operators, be accurately updated each year and returned to SERA.

SERA RECOMMENDED FM VOICE SIMPLEX

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

PLEASE NOTE

The Repeater Journal lists subtones used on repeaters ONLY if they are requested to be listed by the sponsor or owner. The listing of a subtone on any repeater does not in any way indicate it being a "Closed" repeater. Generally in most cases, the tones are used to eliminate noise problems and are listed at the owners request for users convenience.

Have Shack, Will Travel......

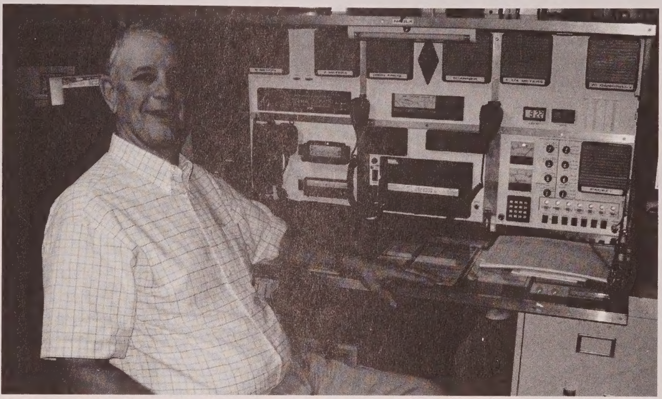
Rick Grubbs, N4QLX

Special to the Repeater Journal

Introduction

A few years ago, my wife decided to start her own business, a contract computing business. Of course she needed some space in which to operate this burgeoning enterprise. The obvious choice was our study where we already had our computer hutch and desk. While this area was perfect for her business needs, one problem came up. This area served as my "Ham Shack". After a long period of soul searching, about five minutes, it was decided that the shack could and would be relocated. But what would I do for a shack? I had a space to go, a basement playroom, but I had no facilities to use for this purpose. I had to come up with something to put my equipment on and a place to operate. I guess the saying is true, "Mother is the necessity of invention."

Several factors were considered. Among these were portability, flexibility, ease of operation and aesthetics. Since being licensed in 1987, I have been very interested in the Emergency Communications aspect of our hobby. I try to participate in public service events and simulated and real emergency situations whenever possible. One thing that always bothered me when participating in the events was having to partially disassemble my station to get a piece of equipment to use. Having a station that is easily operated was also a big consideration since the situation could arise where other amateurs could have the need to use it. The station would be utilized as my primary operating position so controls and looks were important factors also.



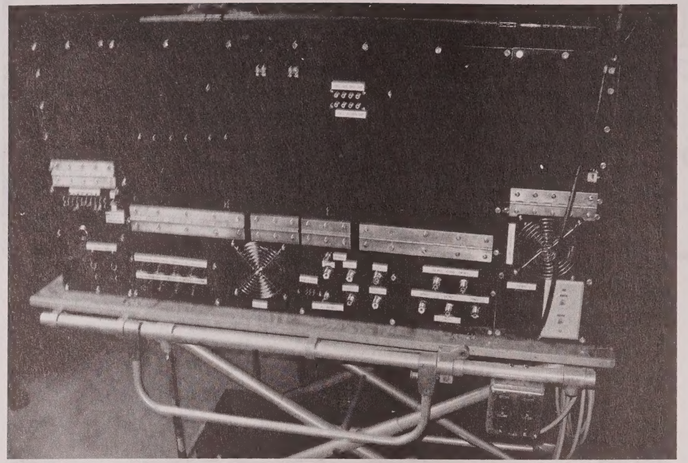
Rick, N4QLX, at his portable station. The entire station is can be set up in minutes.

In order to hold the cost down to a minimum, the design uses one piece of ¾" plywood and other easily obtained materials. Most items can be found at home centers and hardware stores. The construction techniques are straightforward and require no specialized tools, a circular saw, sabre saw, and hand drill are all that's necessary. The design is flexible enough to allow movement of the equipment within the station. The layout will accommodate a good number of pieces of equipment regardless of manufacturer.

Station Features

The station is capable of transmitting on all amateur bands from 160-meter thru 70-centimeter. All mode operation (AM, FM, SSB, CW, and Digital) is included for all bands 1.8 MHz thru 450MHz. At any given time up to three transmitters can be utilized, two voice and one digital. A "multiband", 25 MHz to 1300 MHz, scanner is also included for use in monitoring public safety agencies in the area requiring assistance. This can be useful in hearing traffic that may need attention without having to go through dispatchers.

The front of the station is in two pieces, a top section and a bottom section. The top section folds up and is locked into place by a strut. A 12-volt fluorescent fixture is mounted under this section and is turned on by a switch on the main control panel. The bottom section folds down and is utilized as a writing area/ information center for the operators. Several reference items are located under a Plexiglas writing surface. These items include "bandplans", message formats, and station license information. There is a tone/pulse telephone at the operating position. This can be utilized if and when landlines are available at the site. A modular telephone plug is also included for a portable computer and access to the Internet. A



The rear panel of the cabinet provides forced ventilation, power, and RF connections

switched 12-volt plug for computer power is also available. Intake and exhaust ventilation fans are installed to circulate air across the equipment inside the station; these fans are controlled from the control panel. Two lighted R.F. power/SWR meters are also provided for three transmitters, HF, VHF, and UHF.

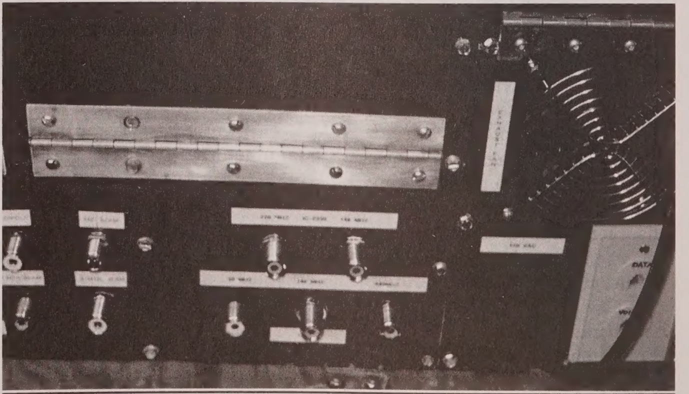
I included handles on the side of the station to facilitate lifting it. Although I normally use it while it's resting on a desktop supported by two file cabinets; I obtained and modified a used medical gurney for transporting the station to and from its normal place. It will also fit in the back of a SUV or station wagon for portable use. The total weight of the station is slightly less than one hundred pounds but takes two people to lift because of its width.

Set-Up

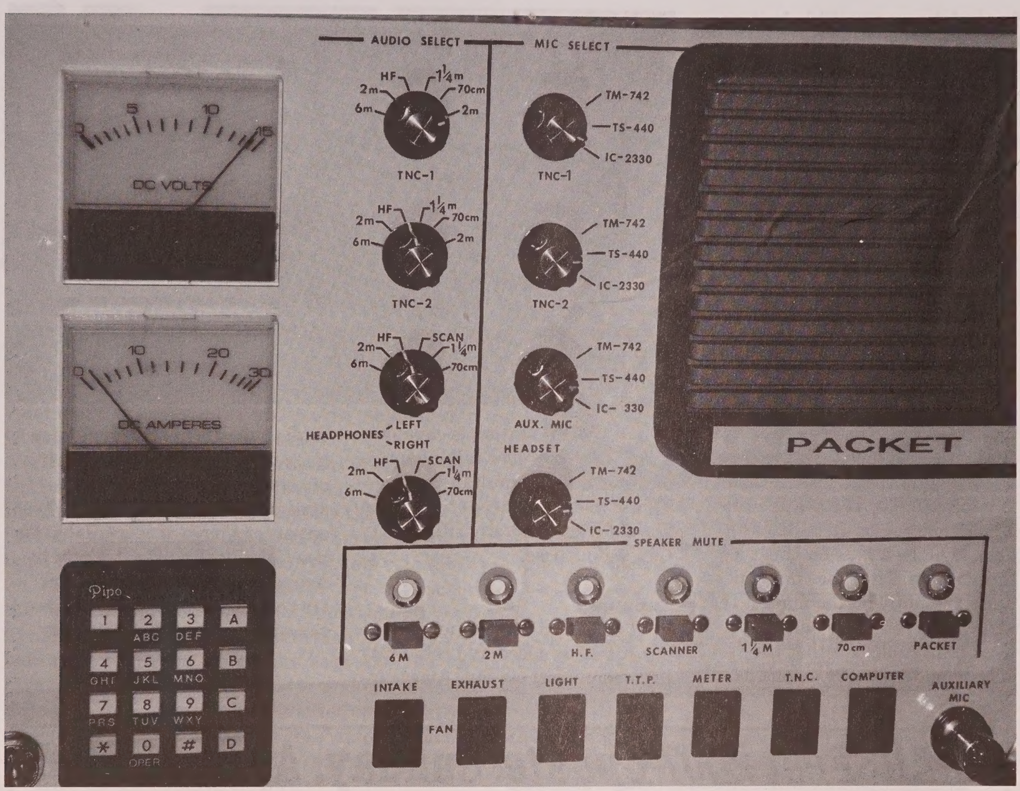
The set-up phase for the station is pretty simple. All equipment utilized in the station operates on 12-volt DC; the only exception is the gel-cell charger. I included two, 26 Amp-hour gel-cell batteries internally mounted to provide power to the station at any time. These two batteries are kept charged normally with an internally mounted charger. I also keep two 42 Amp-hour sealed lead-acid (SLA), deep cycle, UPS batteries on charge, ready to go, to provide power for a longer duration. The lead-acid batteries are kept charged while in use by a 20 Amp Astron power supply when 120-volt AC can be obtained. These batteries can also be charged by the use of a vehicle's alternator if AC is not readily available. Power connections to the station are made utilizing two 30 Amp "quick disconnect" twist plugs. The reason for using two plugs was so that one of the batteries at a time could be removed and recharged without affecting station operation. Each of the nine transmitters included in the station has its own antenna port. Eight are the standard SO-239 UHF type connectors and one is an 'N' type for the 70-centimeter transmitter. Coaxial cables are connected to these ports and the station is ready for operation. I keep several lengths of coax in my ready box for this purpose. The antennas used for the station vary. Types of "dualband" and "triband" antennas can be used in order to keep the number of antennas to a minimum. A "multiband" dipole antenna is used for HF bands to access the large number of bands available. A broadband scanner antenna is used for the station scanner. The antennas mentioned can be installed on a building, in trees, or a portable mast. I have 40-foot portable mast that can be carried along with the station. Its setup is quick, approximately 20 minutes. In less than one hour we can have a complete station setup and operating.

Operations

As stated earlier, one of my initial design aims was to create a station that was simple to operate. I think I accomplished this with the station as it sits. Some of the features I built into it were aimed at versatility of operation. When it is set up, the station will support three operators simultaneously. These three operators are



Detail of the rear panel. Note the forced ventilation and the hinged panel that provides access to the rear of the equipment.

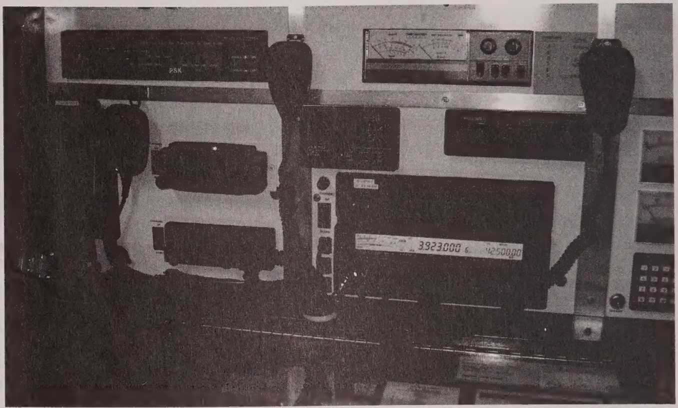


Clockwise, from upper left: Both DC Voltage and current load are monitored by independent meters, TNC audio is switch-routed and each earphone in stereo headphones can monitor different radios, radio microhone inputs are switch-selected, virtually every power load is controlled by a central switch panel, and DTMF tones are generated from a panel-mounted key pad. *(Photos courtesy N4QLX)*

restricted at any given time to two voice and one digital transmission. There are nine separate transmitters in the station in three radios. The radios are: a Kenwood TM-742 "Tribander", for 6-meter, 2-meter, and 1 ¼-meter (220-MHz.) bands; a Kenwood TM-D700A, for 2-meter and 70-centimeter (440-MHz.)bands; and a Yaesu FT-847 and matching FC-20 Antenna Tuner, for High Frequency, 160 thru 10 Meters (1.8 thru 29.3 MHz.) and 6-meter, 2-meter, and 70-centimeter bands on FM and SSB. The TM-742 and TM-D700A are FM only but the FT-847 is an "all-mode" unit. Dual microphone inputs allow only two voice conversations to take place at the same time; however, a digital mode transmission, (packet, RTTY, or CW) could also be held simultaneously. One of the microphone inputs is for a "headset", headphones with a microphone attached. The audio for the six radios is routed through a switching system so that each radio can be heard in the headset for more private listening. Any two of the six receivers can be monitored in either earpiece. The second microphone input is for a standard hand mic. Either mic can be used on any of the six transmitters. A computer can be connected to the pre-wired cables in order to provide for digital communications. This computer is connected to a multi-mode TNC (Terminal Node Controller) mounted in the station. The TNC allows digital communications to be accomplished. These modes are the most effective way of transferring large amounts of information during an emergency. Items such as shelter lists, chemical names, and uncommon technical terms are more easily communicated by digital means. The scanner that is included in the station is a Realistic Pro-2067 "Trunk Tracking" receiver. It is capable of receiving in the frequency range of 25 to 1300 MHz. This includes all the Public Safety frequencies presently used. This can be very beneficial during an emergency situation because you are in the "loop" with the public safety interests while at the EOC without having to rely on someone else to keep you informed. Each radio has its own external speaker mounted on the front of the station. This facilitates being able to hear what's going on. These speakers can also be "muted" by pressing the mute switches mounted on the front panel and indicator lights can quickly show the operators the status of each speaker. I included a 12-volt fluorescent fixture over the work area in the event no power service is available where the station is initially set up.

Mission

My vision for this station is that it would be utilized as a "Mini EOC" setup in the affected area and used to handle radio traffic from the immediate area and relay the information to the State and local EOCs. The availability of multiple radios on multiple bands will be a plus for this type of operation. There are many new units presently on the market that will operate on these bands but their limitations are that they are only capable of being on one band at a time. This station is capable of monitoring and/or talking on multiple bands simultaneously. This would keep the station in the know during most any situation that would arise.



Summary

I hope that this station demonstrates the speed and reliability in communications that Amateur Radio operators can provide during a disaster and the recovery efforts following it. While this station is not typical of what most operations have, it is available for use if the need arises. I would be happy to provide the use of this station during emergency operations throughout the region.

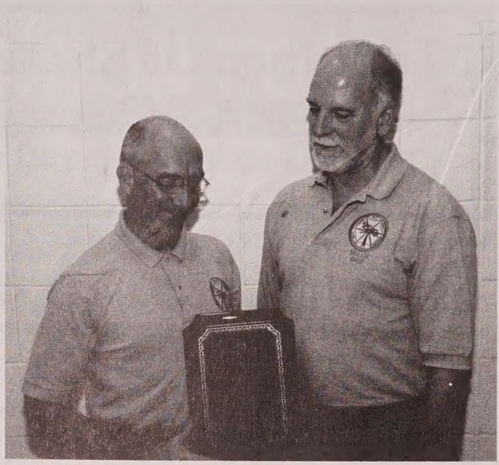
Orange County, NC Commissioners Commend Amateur Radio Operators



Dave Snyder, W4SAR, president of the "Orange County Radio Amateurs" and Stanley "Skip" Fisher, N6LUZ, Orange County EC, admire the plaque presented by the Orange County Commissioners. *(Photo Courtesy K3VSA)*

North Carolina's Orange County Board of County Commissioners, at their regular board meeting on the evening of October 17th, recognized the county's volunteer emergency responders for their continuing service. Commemorative plaques were presented to each volunteer fire department and rescue squad and to the Orange County Radio Amateurs.

Dave Snyder, W4SAR, president of the Orange County Radio Amateurs, and Stanley "Skip" Fisher, N6LUZ, Orange County Emergency Coordinator (EC) for the Amateur Radio Emergency Service, were on hand to represent Orange County's ham community.

Board Chairman Barry Jacobs thanked each of the volunteers who attended for their commitment to community service. Vice Chairman Dr. Stephen Halkiotis spoke at length about his experiences with ham radio operators some years back when he was principal of Orange High School. Hurricane Fran had ravaged the county, all the power and phone service was out, and nobody could communicate. Orange High School became an emergency shelter, and he remembered that the hams assigned to provide the shelter with emergency communications "came whipping in there with those antennas on their cars. They were the first to arrive. The hams could talk to anywhere in the world on those radios," he remarked.

The plaque reads as follows:

"Presented to the Orange County Ham Radio Amateurs in appreciation of your service and dedication to the citizens of Orange County.

Orange County Board of Commissioners

Barry Jacobs, Chair"

Notification Of Election of SERA Officers

To the Editors of *The SERA Repeater Journal:*

As required by the SERA By-Laws I am submitting to you, for publication, the names of the nominees for State Directors and Vice Directors for the 2007 - 2008 term.

Best regards,
H. Alex Hedrick, Jr. N8FWL
SERA Secretary

Georgia		
Director	J. Allen (Pete) Seabolt	N4KHQ
Vice Director	Phil Heaton	N4BBQ
Kentucky		
Director	Michael L McCown	K4ITF
Vice Director	Tim Osborne	K4TDO
Mississippi		
Director	Steve Grantham	AA5SG
Vice Director	Aubrey Bilbo	KE5LT
North Carolina		
Director	Danny Hampton	K4ITL
Vice Director	Frank Lynch	W4FAL
South Carolina		
Director	Roger W. Gregory	W4RWG
Vice Director	Jim Cantrell	WJ4C
Tennessee		
Director	Alan McClain	KA4BNI
Vice Director	To be nominated at a later date	
Virginia		
Director	Jim Campbell	K4YM
Vice Director	Jay Campbell	N4YMY
West Virginia		
Director	Alex Hedrick	N8FWL
Vice Director	Richard L. Dillon	K8VE

SERA NOMINATION FORM

For the Office of SERA State Director or Vice-Director

This completed form must be mailed to the Secretary - postmarked no later than NOON, Nov. 28, 2006.
Note: the Secretary must also be notified verbally by phone no later than NOON Nov. 28, 2006.

To the SERA Secretary:
The below named person is nominated to the Office listed. The nominee has been contacted, has agreed to serve, and an acceptance letter is enclosed. The nominee (1) is a SERA FULL MEMBER, appropriately listed as such in the February 2006 Repeater Journal, (2) is not an officer in any other co-ordination council (3) and fully qualifies under the bylaws of SERA to hold office. It is understood that this nomination from the floor, signed by myself and THREE other eligible SERA Full Members, will be added to the nominating committee's list of nominees. This "from the floor" nomination will cause an election to be held by written ballot, mailed to every Full Member in the SERA District the nomination effects .

NOMINEE INFORMATION: (Use separate sheet for EACH Nomination - Director or Vice Director)

Nominated for the SERA State office of ______________________ for (State) ________

Name ____ Callsign ____________

Address ___________________________________ Phone (   ) ____________

City __________________________________ State ________ Zip __________

Is a representative of the ____________________________ Full Member Repeater System

Person has been contacted and has agreed to serve: [   ] Yes.   Acceptance letter enclosed? [   ] Yes

Please include a brief biographical sketch of nominee on separate sheet of paper.   Enclosed? [   ] Yes

This SERA Nomination is certified by:

Name [print] ___________________________ Callsign ______________ State ________

Phone [   ] _________________ Signature ______________________________

I am a member of ______________________________ SERA Full Member Repeater Group.

Please list three other Full Member Repeater Representatives (each must sign this sheet)

(1) Signature ______________________________________ Callsign __________

(2) Signature ______________________________________ Callsign __________

(3) Signature ______________________________________ Callsign __________

Mail this fully completed form with other necessary paperwork to:

ALEX HEDRICK N8FWL, SERA Secretary, 1021 Woodlawn Ave, Beckley, WV 25801.
This mailing must be postmarked no later than NOON November 28, 2006, and verbal notification by phone (888) HAM-SERA (888-426-7372) to the Secretary is required by NOON Nov. 28, 2006.

IMPORTANT: All eligibility conditions for nominee as per SERA Bylaws, and all requirements of this nomination form must be met for a legitimate nomination from the floor. Otherwise, the nomination must be disqualified as non-valid for the forthcoming Director/Vice-Director election.

FCC Releases New Rule Changes

ARRL Report

Ending a protracted waiting period, the FCC's Report and Order (R&O) in the so-called "omnibus" Amateur Radio proceeding, WT Docket 04-140, was adopted October 4 and released October 10. In it, the FCC adopted nearly all of the changes it had put forth in its 2004 Notice of Proposed Rulemaking (NPRM) in the proceeding. The R&O the FCC released this week does not include action on the Commission's proposal to eliminate the Morse code requirement for all license classes. A Report and Order in that proceeding, WT Docket 05-235, is pending. ARRL President Joel Harrison, W5ZN, expressed the League's gratitude to the FCC for acting this week in the wide-ranging proceeding.

"On behalf of the ARRL and the Commission's licensees in the Amateur Radio Service I want to express appreciation for your release yesterday of the Report and Order in WT Docket 04-140 (FCC 06-149) amending Part 97 of the Commission's Rules," Harrison wrote October 11. "The Commission's action in clearing this pending proceeding will assist the Amateur Radio Service in meeting its objectives, particularly with regard to providing emergency and public service communications."

The Highlights

In its October 10 Report and Order, the FCC:

- expanded the phone subbands in the 75 and 40 meter bands;
- agreed to allow Novice and Tech Plus (Technician with Element 1 credit) licensees to operate in the General class CW subbands on 80, 40, 15 and 10 meters;
- implemented rules to discourage multiple vanity call sign filings on the same day from the same applicant;
- permitted auxiliary stations to transmit on portions of the 2 meter band;
- permitted the use of spread spectrum on 222-225 MHz;
- permitted amateurs to retransmit communications from the International Space Station;
- permitted amateur licensees to designate a specific Amateur Radio club to receive their call sign in memoriam;
- eliminated certain restrictions governing the manufacture, marketing and sale of external RF power amplifiers intended for Amateur Radio use;
- clarified that "amateur stations may, at all times and on all frequencies authorized to the control operator, make transmissions necessary to meet essential communication needs and to facilitate relief actions";
- deleted the frequency bands and segments specified for Radio Amateur Civil Emergency Service (RACES) stations;
- deleted the requirement to publicly announce Amateur Radio examination locations and times, and
- permitted Amateur Radio stations in Alaska and surrounding waters more flexibility in providing emergency communications.

The FCC also took several other miscellaneous actions.

"Novice Band Refarming"

In response to an ARRL Petition for Rule Making, the Commission agreed to "refarm" the HF segments currently authorized to Novice and Technician Plus licensees. The reallocation will expand the phone subbands for General, Advanced and Amateur Extra licensees, although not all commenters agreed with the idea.

"We are persuaded, however, by ARRL's contention that increasing the amount of spectrum for voice communications will reduce interference among stations using voice communications," the FCC said in its R&O, "thereby benefiting all licensees, and that authorizing more spectrum for voice communications will more closely reflect licensees' operating preferences, thereby resulting in more efficient use of amateur service spectrum."

On 75 meters, Generals will be able to operate on phone from 3800-4000 kHz, an increase of 50 kHz. Advanced class licensees will be able to use voice from 3700-4000, an increase of 75 kHz, and Amateur Extras will be able to use voice from 3600 to 4000 kHz -- a generous increase of 150 kHz and substantially more spectrum than the League had requested for phone operation on 75. The ARRL had sought an additional 25 kHz. The FCC provided 150 kHz.

"Indeed, a number of commenters argue that the NPRM proposal to increase the amount of spectrum permitted for voice communications would still not meet the demand for voice communication spectrum in the HF bands, particularly in the 80 meter band," the FCC noted in the R&O.

On 40 meters, Advanced and Extra Class licensees will be able to use voice from 7125-7300 kHz, an increase of 25 kHz. General class licensees will be able to use voice on 7175-7300 kHz, an increase of 50 kHz.

On 15 meters, General class operators will have phone privileges on 21275-21450 kHz, an increase of 25 kHz.

To accommodate the remaining Novice and Tech Plus (or Technician with Element 1 credit) licensees on HF CW, the FCC affirmed its intention to permit these licensees to operate CW in the current General exclusive-CW allocations on 80, 40, 15 and 10 meters.

"In this connection, we note that the comments generally support maintaining HF frequency allocations for Novice and Technician Plus Class licensees stating, for example, that the Commission's proposal 'would simplify the band plans and ... also provide Novice and Technician Class licensees the opportunity to contact a greater number of other amateur operators,'" the FCC said. "Other commenters support the Commission's proposal on the grounds that it would 'increase utilization of the three bands involved' and 'generate and continue the effective and efficient use of valuable and priceless spectrum, generate experimentation, and further the advance of the industry.'"

Novice/Tech Plus licensees still may only run no more than 200 W PEP on those HF CW segments, but the Commission has done away with similar power limitations on HF segments for higher-class licensees, with the exception of the 200 W PEP power limitation already in place on 30 meters and the 50 W ERP restriction on 60 meters.

Vanity Call Sign Applications

The FCC has revised its vanity call sign rules to discourage the filing of multiple applications for the same call sign on the same day, and many commenters supported this concept. As implemented in Â§97.19(d)(1), if the FCC receives more than one application requesting a vanity call sign from a single applicant on the same receipt day, it will process only the first application entered into the Universal Licensing System. "Subsequent vanity call sign applications from that applicant with the same receipt date will not be accepted," the rule concludes.

Current Commission rules and procedures do not preclude applicants from filing multiple applications on the same day for the same vanity call sign, provided that they pay the filing fee for each application.

"We are persuaded that we should adopt rule amendments to discourage multiple vanity call sign applications," the FCC said in the R&O, "and we believe that a one-application-per-day-per-applicant rule, as requested by ARRL and others, will eliminate multiple applications requesting the same assignable call sign on the same day."

The FCC concedes that its one-application-per-day rule "will not prevent an individual from requesting multiple vanity call signs per se," because an applicant may request up to 25 call signs at a time.

When the FCC receives multiple valid applications from several individuals requesting the same vanity call sign as a first choice on the same day, it uses a lottery system to decide which application to process first.

RF Power Amplifiers

The R&O also affirms changes to Part 2 and Part 97 rules the FCC had proposed regarding the manufacture, marketing and sale of external RF power amplifiers. Current FCC rules prohibit commercial manufacturers from marketing RF power amplifiers capable of transmitting on the 12 and 10 meter bands. The rules were put in place as a way to prevent use of such amplifiers by CBers.

"We agree with ARRL that the requirements imposed on Amateur Radio operators by the current rule are unnecessary because, under the present rules, 'the equipment, once authorized, can be modified to transmit on all amateur service frequency allocations,' and that revising the rule 'will enhance use of the 12 and 10 meter amateur bands,'" the FCC said.

To prevent the use of Amateur Radio amplifiers by CBers, the FCC says it's still necessary to require manufacturers of Amateur Radio amplifiers design their products to avoid operation on the CB frequencies.

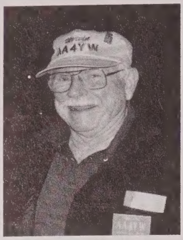
"We will, therefore, retain the requirement that amplifiers exhibit no amplification capability between 26 MHz and 28 MHz and require manufacturers to certify that amplifiers are not capable of amplification between 26 MHz and 28 MHz and are not easily modifiable to operate between 26 MHz and 28 MHz prior to the grant of an equipment certification," the FCC said.

The FCC also concluded that the definition of an external RF power amplifier kit is no longer needed in Part 97.

The Commission said it may deny certification of external radio frequency power amplifiers to prevent their use in services other than the Amateur Radio Service. Non-amateur licensees will not be permitted to construct or modify an RF amplifier capable of operation below 144 MHz without a grant of certification from the FCC. Radio amateurs may build or modify RF amplifiers for use at an Amateur Radio station without a certification grant, however.

Effective Date

The changes spelled out in the R&O go into effect 30 days after their publication in the Federal Register.



Let's Look At It--- This Way !!!

Marvin Whatley, AA4YW

The Right Idea

For as long as there has been history there have been journalists. On the walls of ancient Egyptian temples and tombs are hieroglyphics that tell accounts of things that happened. In ancient Greece they didn't make such a big deal about them. (No one really believes Homer.) During the renaissance there was the town crier who mostly remained anonymous. In early America Ben Franklin wrote for his paper presenting his opinion of what was going on. Then came the first amendment, then the availability of pulp newsprint and eventually an avalanche of reporters contending for recognition and fame. In modern on-scene reporting a substantial fraction of air-time is devoted to the reporter identifying himself. There has bloomed a mystique around these selfless individuals who put themselves in harms way so that the public will know and understand. Just like Hollywood went through a period when a frequent subject of movies was movies, the people who made movies and the terrible and wonderful problems surrounding them, now it seems that a common item of news is the burdens and tribulations of the courageous people who bring us the news. There have emerged from this mélange a cadre of giants who, through their unique perception and analysis, lead us to our understanding of our world. In addition to the mind-boggling power this implies, I believe they get paid quite well.

I like to know what is happening. Well, not everything that is happening, but a few particular unfolding events gain my interest. For some events I would like to know a few particular facts and for others a greater depth of detail. I have criteria for the kind of information I want. I personally learn little from screaming women or crying children. The world appears to be full of people who want to know what is happening, but they are not all like me and have a wide range of things that interest them and vary on the sorts of things they want to know about them. There must be many who learn much from screaming women and crying children. It is the journalist who prepares the material and sells us his ware through what are now called the media (and you know what those are).

I remember that the basics of reporting included: who, what, when and where. There was a time when it was thought that these were all you needed. Give the facts to the public and they will assimilate them and draw conclusions. It has been many decades since this basic format has been followed. Today, journalists feel compelled to include: why, what it means to you (your pocketbook, your safety, your lifestyle, etc.), and, most importantly, who is to blame. One of our famous anchor men (I've forgotten who) was recorded as saying, in effect, "the public doesn't have time nor inclination to assimilate the information. It is not our job to simply present the information, but we are to tell them what to think and how to feel about it." In the very abbreviated and concentrated format of television news what one sees is the harried face of the reporter, gross human suffering, explosions or vast devastation, and one gets the sensation that, "I'm not sure what I just saw, but it was awful." It takes longer to get that effect in print. Sometimes there is good news, but it usually involves some celebrity about whom I have little concern, or some new product that is destined to change our lives forever. The latter is really scary.

So, who are these journalists who bring the world to our door? What I see looks a little like our politicians in the respect that the only ones still around are the ones who sell (get elected). It doesn't matter how good a person is at gathering information and accurately presenting it, if no one reads (watches) it he isn't even there. Putting it off on the publisher changes nothing. The only publishers that have survived are the ones who publish stuff that sells. When a major journalist has a great idea about something, a thought he can develop, or corruption he can expose, there is the first criterion that must be satisfied: will people buy it? The only ones who make the grade are those who most appeal to the public.

So, what appeals to the public? First among the things that shout at you is that they want to be entertained. That doesn't necessarily mean amused. Most Americans seem to be highly entertained by horror, or fear. They want the writer to support their prejudices. Long held views are not to be jostled about with difficult, contrary notions. Facts are good if they don't require too much thinking, and quantitative information must be limited to giving a feel for magnitude.

Statements like “a hundred and fifty percent less than tolerance” are perfectly acceptable since the likelihood that anyone will actually look at them is negligible. The public likes its material to be authenticated. The authority that supports the journalist position may be a prestigious person, or people from prestigious institutions. Celebrities like movie stars and football players also sell well. The public must be confident that the material is accurate, unbiased and complete. Further, the impression that the reader is being given information and insight that diabolical powers are trying to suppress makes it much more attractive. The journalist who can create these illusions has much going for him.

A primary quality of a good journalist is that he be objective and unbiased. Show me a journalist who is objective and unbiased and I will show you a journalist who concurs with your prejudices. It isn’t possible for a thinking person to live more than a score of years without developing some strong notions about what is right and what is wrong and a reasonably rigid opinion about how the world should really be. Most of us agree that there is an absolute standard against which any human enterprise can be judged; it is just in the details that differences arise. The American public reacts with surprise and dismay at the revelation that the eastern and middle-eastern cultures do not embrace our basic Christian principles. The journalist, being human, is encumbered with human characteristics. He has developed a respect for and an understanding about the environment and about whales and eagles and about global warming and energy and about justice and human rights and poverty and terrorism and pro-life and urban sprawl and pollution and the Chicago Bears. It should be understood, and he understands, these are not prejudices nor biases, but basically an understanding of reality. It should be expected that when he writes and presents the news that, if he is to do it an unbiased manner, he must not violate any of the underpinning truths that stabilize his thinking.

The first and probably the most important task of the journalist is to select the events to be presented as news. The world is vast and the number of notable things that happen daily exceeds by large factors what could be processed and presented. The ultimate criterion for selection has already been established: the public must consider it interesting and entertaining; it must sell. Now, there are several major networks and news agencies in competition with each other and through each of these the information must flow. I am continually amazed at how firm and rigid the formula for selection must be when I note that all of the agencies and networks select exactly the same dozen or so stories that comprise the news. Usually the video coverage is very similar and with alarming frequency I can flip from network to network and find each is covering the same story at the same time. (This makes me uncomfortable, but I’m not sure why.)

By the act of selecting which stories are to be covered they are telling the public what in this world is important. Further, if only a half dozen sentences and a half dozen video shots constitute your coverage of an event, you can put any kind of spin on it you want. You can make the viewer think it is a gift from God, or the ultimate atrocity. We all know (intellectually), but are always taken in by the fact that what we are seeing is the most extreme example of whatever the reporter has in front of him. We see the deepest water of the flood or the most completely destroyed building of the quake or the most oil-soaked shore bird or the most mutilated bomb victim, and our perception of the event is generally distorted. But this is what sells, and this is what makes great journalists. There is no sense in attributing diabolical motives here, they just doing their jobs, giving the public what it wants, selling ads, and making money.

Every once in a while a news agency (or network) will conduct a poll to discover what the people are really thinking. After the press has developed a particular spin on an item for weeks, it asks the man on the street for an opinion. Naturally, he says exactly what he has been told which allows the agency to announce with confidence that they were right all along. OK.

Periodically publishers (networks) look to journalists for a more extensive treatment of an issue. Topics are generally those that seriously impact particular segments of our society but attract national attention and about which the public has only superficial familiarity. I have in mind things like the Atlantic fishing industry, open range cattle, off shore drilling, foreign military action, solar power development, and such. This is important because in our democracy everyone has a right to his opinion and is encouraged to express it regardless of how little he knows. The media has assumed responsibility for the public having the right opinion on things. The journalist who might spend several weeks on a subject is in position to present a comprehensive, true picture. There are always technical aspects that, admittedly, he never really understands (he keeps the layman’s point of view), but this is fine because he has interviewed experts from both sides and he skillfully quotes them. He also reaches into the personal lives of a few affected individuals, covering the economic, medical and social implications. As he is putting this together into an entertaining and unbiased opus he is trying valiantly (more or less) to ignore his private opinion of the way it should come down. He quotes the right and then the left, but he has some discretion as to what from each makes the copy, and he may also chose among various pictures (sometimes with music) to illustrate the situation. In the final version the uncertainty and controversy are clear but now the important facts are before the public who have been properly entertained. If he were good, the public now has the correct opinion.

All of this could be shrugged off as an innocent foible of modern life but for a few important considerations. First, our government is playing a greater and greater role in what happens in our lives. It now controls virtually all research and most large projects, and that which it doesn't control directly it controls by regulations. Secondly, the government is more responsive to public opinion now than it has ever been. Public reaction to everything reported by the media reaches lawmakers with electronic speed. Thirdly, our journalists are not necessarily the wisest members of our culture and, in their effort to be successful journalists, may make bad and even dangerous choices. We need not ascribe evil intentions, but their motives, while largely undefined and arbitrary, certainly manifest an ulterior component: go with what sells. It is true that journalists have always influenced the course of history but it was usually construed that the press was, in fact, the voice of the people. Noting the impact of technology and in the light of the above considerations, we wonder whether it has been reversed and now the people are the voice of the press.

Attention

Effective imediately, send all correspondance for *The SERA Repeater Journal* to the following address:

The SERA Repeater Journal
410 East Sprague St
Winston-Salem, NC 27127

This includes all editorial content (stories, news, pictures), advertising, and comment.

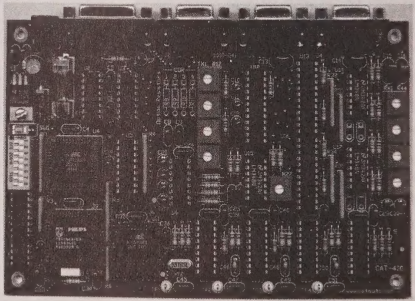
State news should be addressed to the appropriate state correspondent.

Coordination issues should be sent to the Frequency Coordinator (FC) having geographic jurisdiction.

For addresses and telephone numbers, please consult the listings in the front of this magazine.

CAT-400 Repeater Controller

This controller combines the features of the popular CAT-250 controller and the RLS-1000 Remote Link Switch into a four- port controller ideally suited for sophisticated linking systems.



Features Include:
Voice Synthesizer ID
(20) Voice Messages
(1) Repeater Port
(3) Remote Base Ports
(4) DTMF Decoders
CW Identifier
DTMF Audio Muting
DTMF Pad Test
(40) User Macros
(50) Event Macros
(64) Control Functions
(4) Logic Inputs
(4) Output Switches
Internet Firmware Upgrades
Optional Windows® Editor

Scholarship Information

Every year, through the generosity of your fellow amateurs, scholarships are awarded to amateurs seeking to further their education. Generally, these scholarships are not restricted to any course of study, but the applicant must be seeking at least an Associate degree from an accredited college or university. Also, it should be pointed out, these awards are not restricted by age!

Many amateur radio scholarships are administered by the Foundation for Amateur Radio (FAR), including 10-10 and QCWA. All these awards may be qualified for through a single application. Some awards require sponsorship by a member of a particular organization (just a signature, in most cases), so plan to begin you application early to allow ample time to collect the information you'll need.

Requests for the application package should be sent by April 30 to

Foundation for Amateur Radio
PO Box 831
Riverdale MD 20738-0831

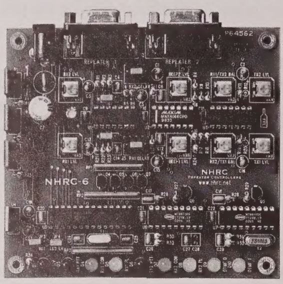
NHRC
REPEATER CONTROLLERS



NHRC-6
Dual Repeater Controller

The NHRC-6 is an advanced, low cost dual repeater controller. It has a highly integrated design, using state-of-the-art components, which results in a powerful controller with a low parts count. This increases reliability and lowers cost.

This controller can be used to control two duplex repeaters, a duplex repeater with a link radio, or to build a bi-directional cross band repeater with simplex radios.

NHRC-6 Features

- Two radio ports that can support the following configurations:
    - two duplex repeaters.
    - duplex repeater with link radio.
    - two back-to-back simplex radios.
- Carrier, Carrier and CTCSS, Carrier or CTCSS and DTMF Access Modes.
- "Intelligent" ID algorithm.
- 55 Control Operator Settings.
- Six User Commands.
- Five saved setups.
- Distinctive Courtesy Tones indicates active receiver ports.
- Dedicated Fan Control Output/Digital Output.
- Touch-Tone remote control and programming.
- Hang timer, ID timer, Timeout timers, Fan Timer, and CW messages stored in non-volatile memory.
- Individual audio gating on each port allows use of non-squelched receiver audio.
- Jumper-selectable receiver deemphasis.
- LED CAS, CTCSS, PTT, and DTMF indicators for each port.
- Connectors for each port to attach optional NHRC-DAD Digital Audio Delays, to fully mute DTMF and help eliminate Squelch Crashes.

NHRC-6 Dual Repeater Controller $219

Boy, there's nothing like a good hamfest to get us in a good mood! Jean Marie and Tom were found at the Shelby Hamfest over Labor Day, and Tom road up to visit with Don and Fred up in Roanoke and brought back these pictures (thanks, Roger, for the Shelby pix!) Tom is seen at the Winston-Salem hamfests, of course... all THREE of them each year, but never thinks to bring back snapshots. If you see us, be sure to stop and say "HEY."

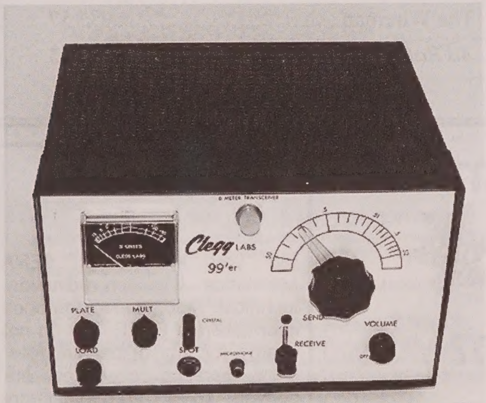
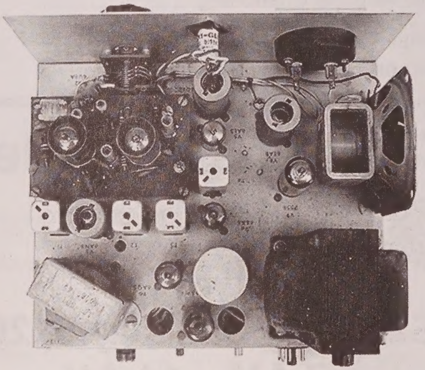
Nostalgic Wavelengths

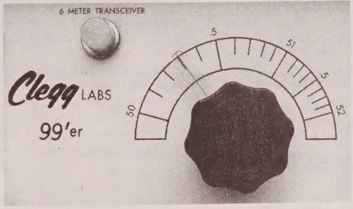
David Bower, K4PZT

"The Clegg 99'er"

The Clegg 99'er was introduced in the early 1960s as a low cost 6 meter transceiver to provide dependable operation for the discriminating amateur. While the design was basic in concept, it offered technical and operational features suitable for the serious VHF ham desiring to explore the Magic Band. A dual conversion receiver with noise blanker provided optimum performance. A dual section 6DJ8 operated as a cascode amplifier for better gain. The six meter output was coupled to one section of a 6U8 mixer. The other section of the 6U8 served as the first oscillator. The output of this mixer was fed to a 6AN8 2nd mixer/oscillator. A large tuning knob with a 5 to 1 vernier mechanism made it easy to operate. The dial divisions were in 0.1 mc increments. A spot button helped zero in on the transmit frequency, and was very useful when an external VFO was employed. As provided, the Clegg 99'er was intended for use with standard FT-243 type 8 mc crystals. A dual section 6EA8 served as an oscillator/doubler and multiplier. The third harmonic (in the 25 mcs range) was coupled to the multiplier (or doubler) to arrive at the 50 mcs operating band. The RF amplifier, a 7558, provided a nominal input power of 8 watts. A large meter was mounted on the left front of the transceiver for both transmitter tuning, and switched as a S-Meter in the receive mode. For transmit, plate tuning and loading controls were provided along with a multiplier control to maximize the drive to the final RF amplifier. A common transformer was utilized for both transmitter AM modulation, and receive audio to drive the speaker. A 6AQ5 and 12AX7 were used in the audio amplification circuit. A full wave power supply, with 6BW4, produced well filtered DC voltage for the transceiver.







Operating Provisions

The Clegg 99'er was equipped with a 11 prong rear connector that could be configured for operation with the included AC power connector or with a separate connector for mobile operation. Normally, to conserve power for mobile operation, the filaments could be wired separately; along with a separate high voltage power supply. And, for mobile operation, the filaments could be wired for either 6 or 12 volt operation. The 11 prong socket also provided provisions for powering an external VFO; or could be wired to feed an external speaker or earphones.

Priced at just over $ 125.00, the Clegg 99'er was a great bargain for the entry level ham, serious VHF'er and those wanting to operate mobile on the Magic Band.

FEBRUARY *ISSUE*	*January 1*
MAY ISSUE	*April 1*
AUGUST ISSUE	*July 1*
NOVEMBER ISSUE	*October 1*

My Word!

Well, I have a bit more than I did last quarter. First off, thanks to all the members for their patience! With this issue, I can say we now have completed the transfer over to the new team. Please, if you want to contact *The Repeater Journal*, make sure you're sending to Winston-Salem!

Hamfests continue to be interesting to watch. While it's true that many of the "old standard" hamfests have ceased operation, and others have been taken over by new groups, it's also true that new shows are coming on the scene. Just last weekend, a couple of hundred folks found their way out to Pfafftown, NC to attend one of the *three* shows that my home club is putting on this year. Sure, the shows are smaller. Both Raleigh and Charlotte are looking at venues more in-line with the current climate, and there was concern about the big show at Shelby. However, the hamfest committees ironed out the kinks and are moving forward, and the entire ham community owes them a big THANK YOU!

Another topic that's out there is the the possible conversion of Amateur repeaters to some sort of digital standard. The SERA gurus are working at fever pitch to concoct an appropriate deployment plan--- but they are well aware that it must be well thought-out, because the decisions made today will affect amateur radio for decades to come. In the meanwhile, systems such as D-STAR can be put on the air under the current coordination rules, with the understanding that coordination may be re-aligned. As a side-note, I spent about a half-hour on the phone with Ray Novak of ICOM the other day, and he dropped an amazing statistic on me: 60% of the D-STAR systems that are on-air in the US are in the southeast! This is good technology, and when you hear it you'll be amazed!

Well, I've run short on space, so that's it for now. Thanks for reading. Why not ask a friend to join SERA?

New
DJ-V17
makes a SPLASH
with great audio and high grade waterproof design!

Actual Size

Alinco is proud to introduce a new 5-watt full power 2M HT that makes a perfect companion for outdoor activities like fishing, camping or snow-sports.

The rugged polycarbonate materials are compatible to IPX7* so it's submersible 1m/3ft. for 30 minutes! And unlike water-resistant radios you may have looked at before, the DJ-V17 has a large 40mm internal speaker so its audio is clean and crisp, not muffled. You can enjoy 500mW max audio-output, new two-touch repeater access, and over 200 memories. A special battery-drain function helps avoid battery memory-effect. Other features include an ergonomic design, ultra-flexible antenna with SMA connector, 39 CTCSS settings, split function, two-level attenuator and more. Whatever your idea of outdoor fun, Alinco's DJ-V17 is ready to take on the challenges of rain, dirt and dust and come back for more.

- New, two-touch repeater access
- High grade waterproof materials compatible to IPX7* (submersible 1m/3ft. for 30 min.)
- Rugged polycarbonate body resists dirt, dust and moisture
- Large 40mm internal speaker for great audio!
- Highly visible backlit alphanumeric display
- Direct frequency input through illuminated keypad
- 200 Memories, plus one call channel and one repeater access parameter memory
- VFO, Memory and Scan modes
- Ultra-flexible antenna with SMA connector avoids breakage
- 39 CTCSS tone squelch (encode+decode) settings
- Tone burst function (1,000, 1450, 1750 and 2100Hz)
- Battery-drain function avoids memory-effect
- Cloning feature
- Ni-MH standard also uses optional Lithium-ion and NiMH battery packs or AA dry cell case
- SMA antenna port
- 2-level attenuator
- Waterproof single mic/speaker jack

Alinco guarantees this feature for 1 year provided all jack covers are properly and securely closed.

(Actual Size)

ANALOG & DIGITAL.

It's not just digital. Analog is there, too. Both capabilities in one radio. And what a new radio it is! With infrastructure and a family of D-STAR compatable radios, you're not buying an experiment. That said, digital is the future of amateur radio. And experimentation is a foundation of ham radio. So now you have to ask yourself, "do I pick up the analog only '91A version, which is optionally upgradeable to digital? Or do I take the '91AD, which offers digital right out of the box?" It's your choice. Commitment can be a wonderful thing.

Coming soon to your authorized Icom dealer!
